

CRUST
The Money Saving App

Brief

Money Saving

Design a money saving app for users who want to save money, quickly, for a particular reason.

Broken into 2 parts, firstly:

1 Design the branding

Secondly:

2 Design the app.

The users are not new to technology but do not like working with their finances. So, they require that the information they receive via the tool is accessible, and clearly tells them what they can do to better save

Guiding Principles

- C Clarity
- R Reliability
- U Usability
- S Simplicity
- T Trust

“A finance app you can trust.”

“It’s like having a financial advisor in your pocket!”

“Anyone can save money!”

“You don’t need to be a financial expert to use our app.”

We aim to deliver a simple, unintimidating budgeting solution to busy people looking to save for specific, short term reasons.

We take our users money seriously so we want to convey a serious image that conveys reliability and trust but also want to be approachable and open.

We don’t want to confuse our users so simplicity and clarity are key to design and explanations

This is CRUST

- 1 Earn your crust
- 2 Crust often associated with the part of food that is wasted or
- 3 saved and therefore can be repurposed
- 4 Bread crust is the most wasted food in the UK
- 5 Crust there fore can be associated with saving and repurposing
- 6 Crust forms a neat acronym for our key guiding principles
- 7 Bread winner means the person who earns the money
- 8 Bread and honey in cockney rhyming slang means money
- 9 Bread therefore is often associated with money

Colours

Text should appear
In teal green when on a white background

Text should appear in bright green when
on a teal background

Primary

Teal Green

Hex #004F54
HSL 184 100 16
RGB 0, 79, 84

Bright Green

Hex #F5FF00
HSL 62 100 50
RGB 245, 255, 0

Secondary

Soft Pink

Hex #E635A0
HSL 324 78 55
RGB 230, 53, 160

Light blue

Hex #83BCFF
HSL 212 100 76
RGB 131, 188, 255

Typography

Clear, Uncomplicated Typeface
That Communicates Sincerity,
Trust And Openness.

San serif is more approachable because of the lack of fancy
decoration and whilst a rounded design comes across as
friendly and trust worthy and sharper design works better for a
serious topic like finance

07 | Task Breakdown

Task Breakdown

The Brief Included Many User Stories Which I Broke Down Into Tasks And Requirements

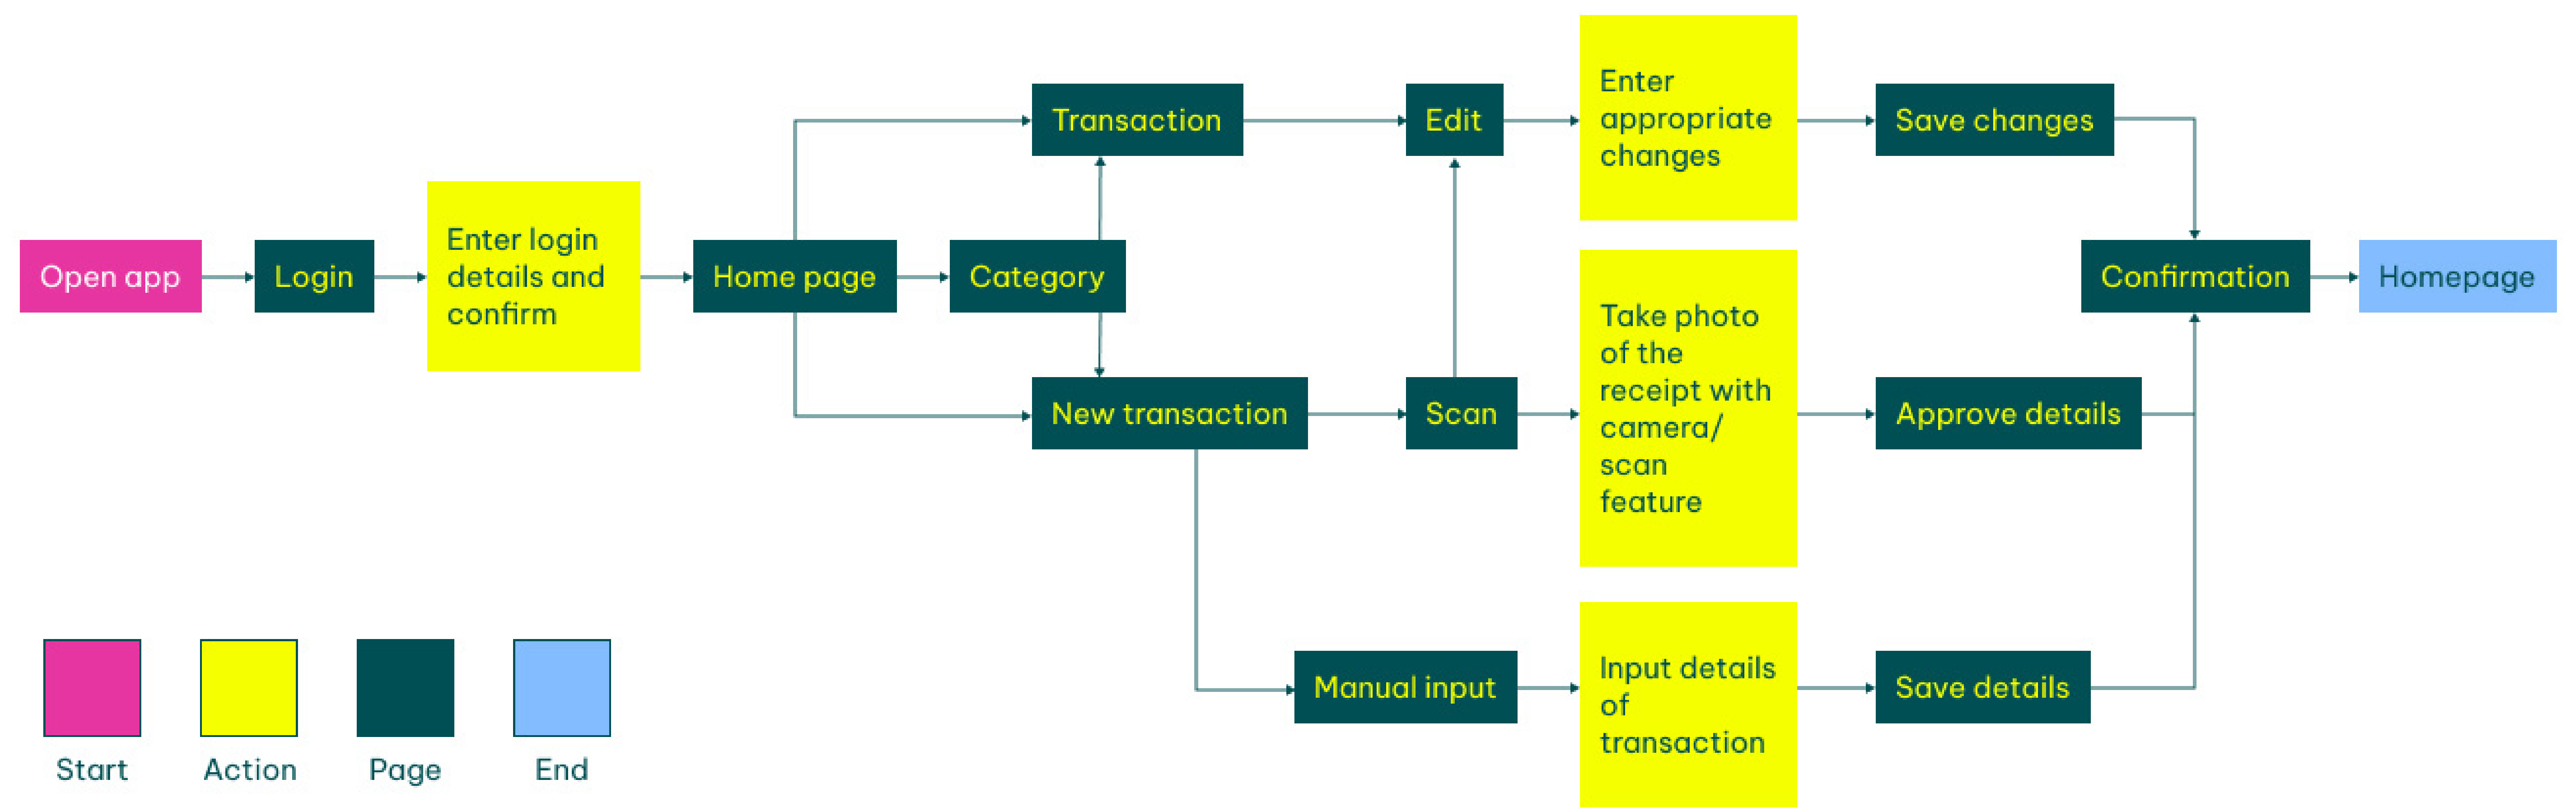

Tasks	Page Requirements
▶ Create Profile	▶ Sign up
▶ Notifications	▶ New goal page
▶ Set goals	▶ Confirmation
▶ See Finances clearly	▶ Success
▶ Motivational rewards	▶ Scan receipts
▶ Input info on money in and out	▶ Dashboard/homepage
▶ Interact with info/log	▶ Filter page
▶ Filter results	▶ Transaction page
	▶ Transaction log page
	▶ Category page
	▶ Goals page

User Flow

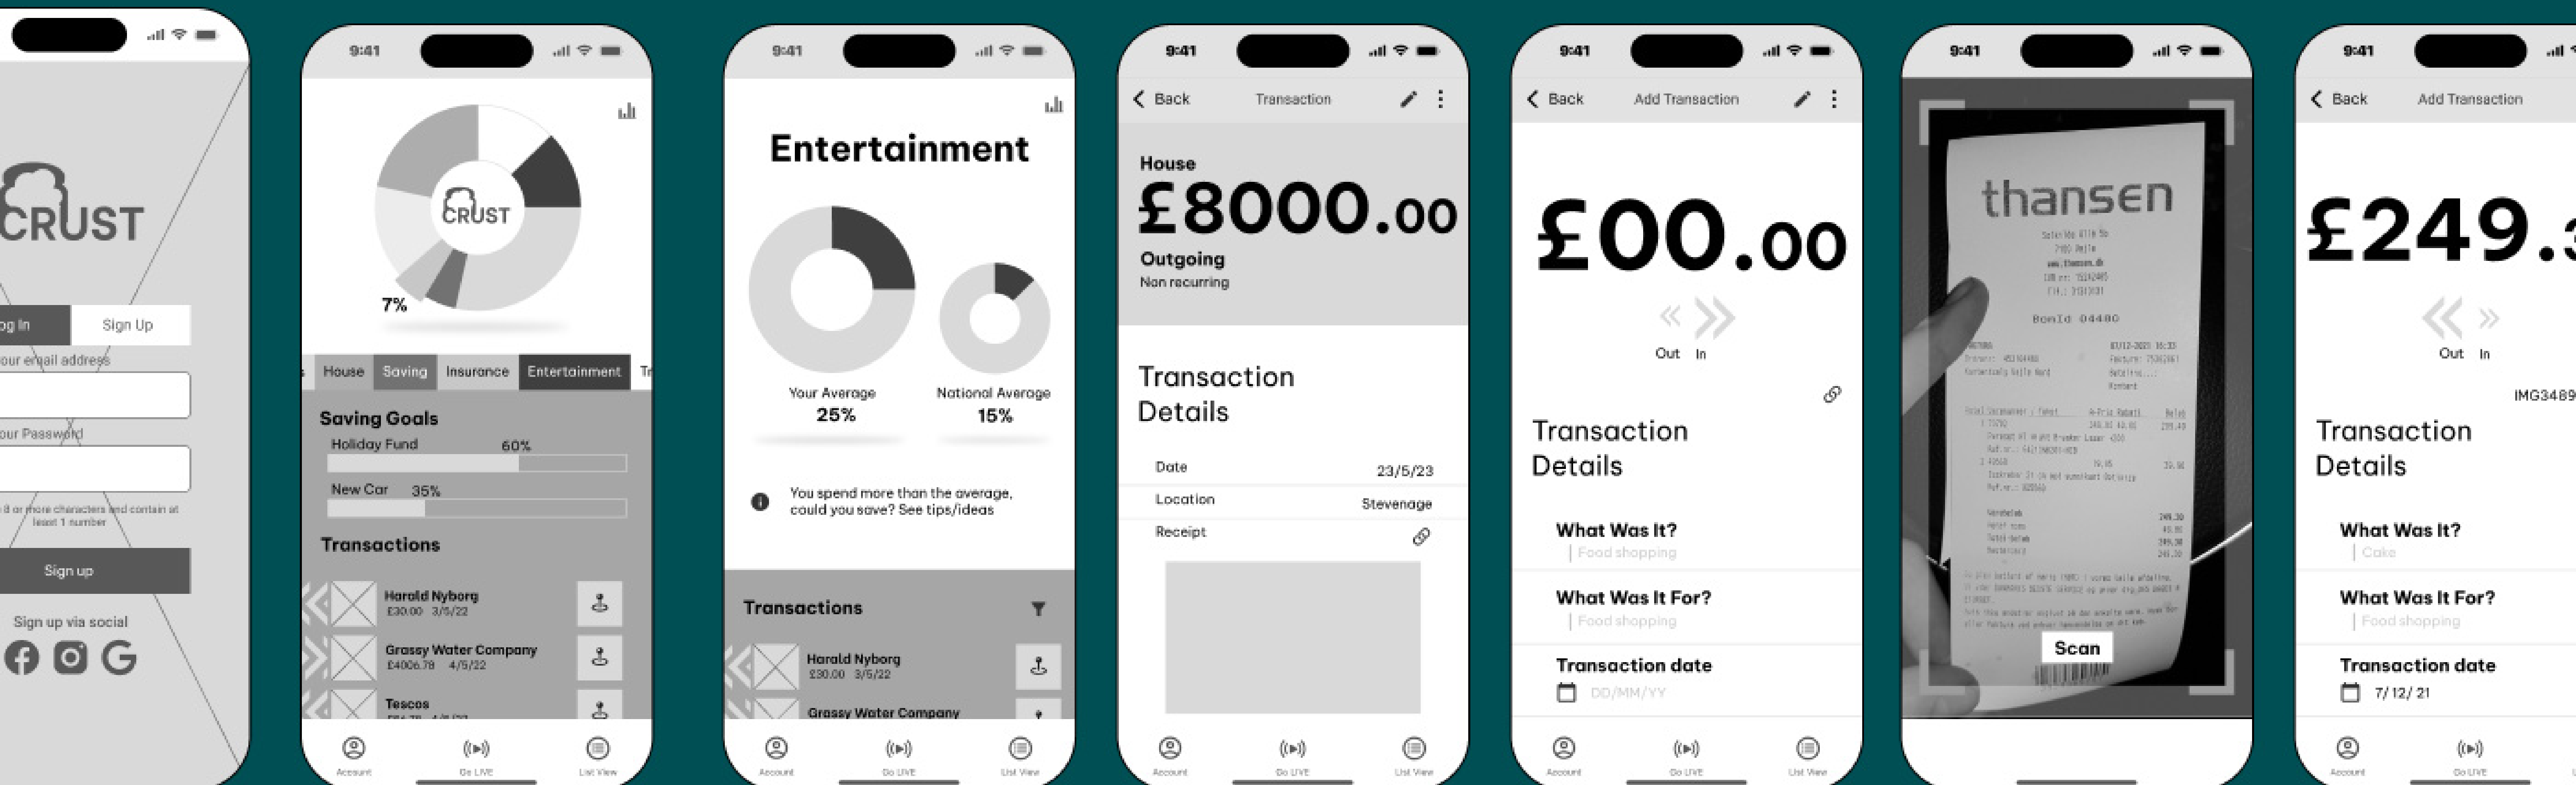

User Story 2

“As a money-saver, I need to be able to input information on the money I am receiving and spending (and on what), so that I can see an overview of my finances.”

User flow based on the assumption of existing registration

Mid Fidelity

User Test

Users were given a series of tasks relating to the user story and asked to comment on the flow.

Whilst feedback on the aesthetic was welcome it was not the main purpose of the test

Task 1 - Find the shell transaction in the transport category for £3040.56, change the date and save

Task 2 - Log a new transaction by scanning a receipt and note that it was for "holiday"

Task 3 - Manually register a new transaction for £249.30

Feedback

- ▶ **Sam Take Away**
Very similar comments to Ruben and Britta

- ▶ **Ruben Take Away**
Avoid duplicating buttons, look at way to identify categories easier

- ▶ **Britta Take Away**
Reduce visual complexity of the pages and spread out the information provided

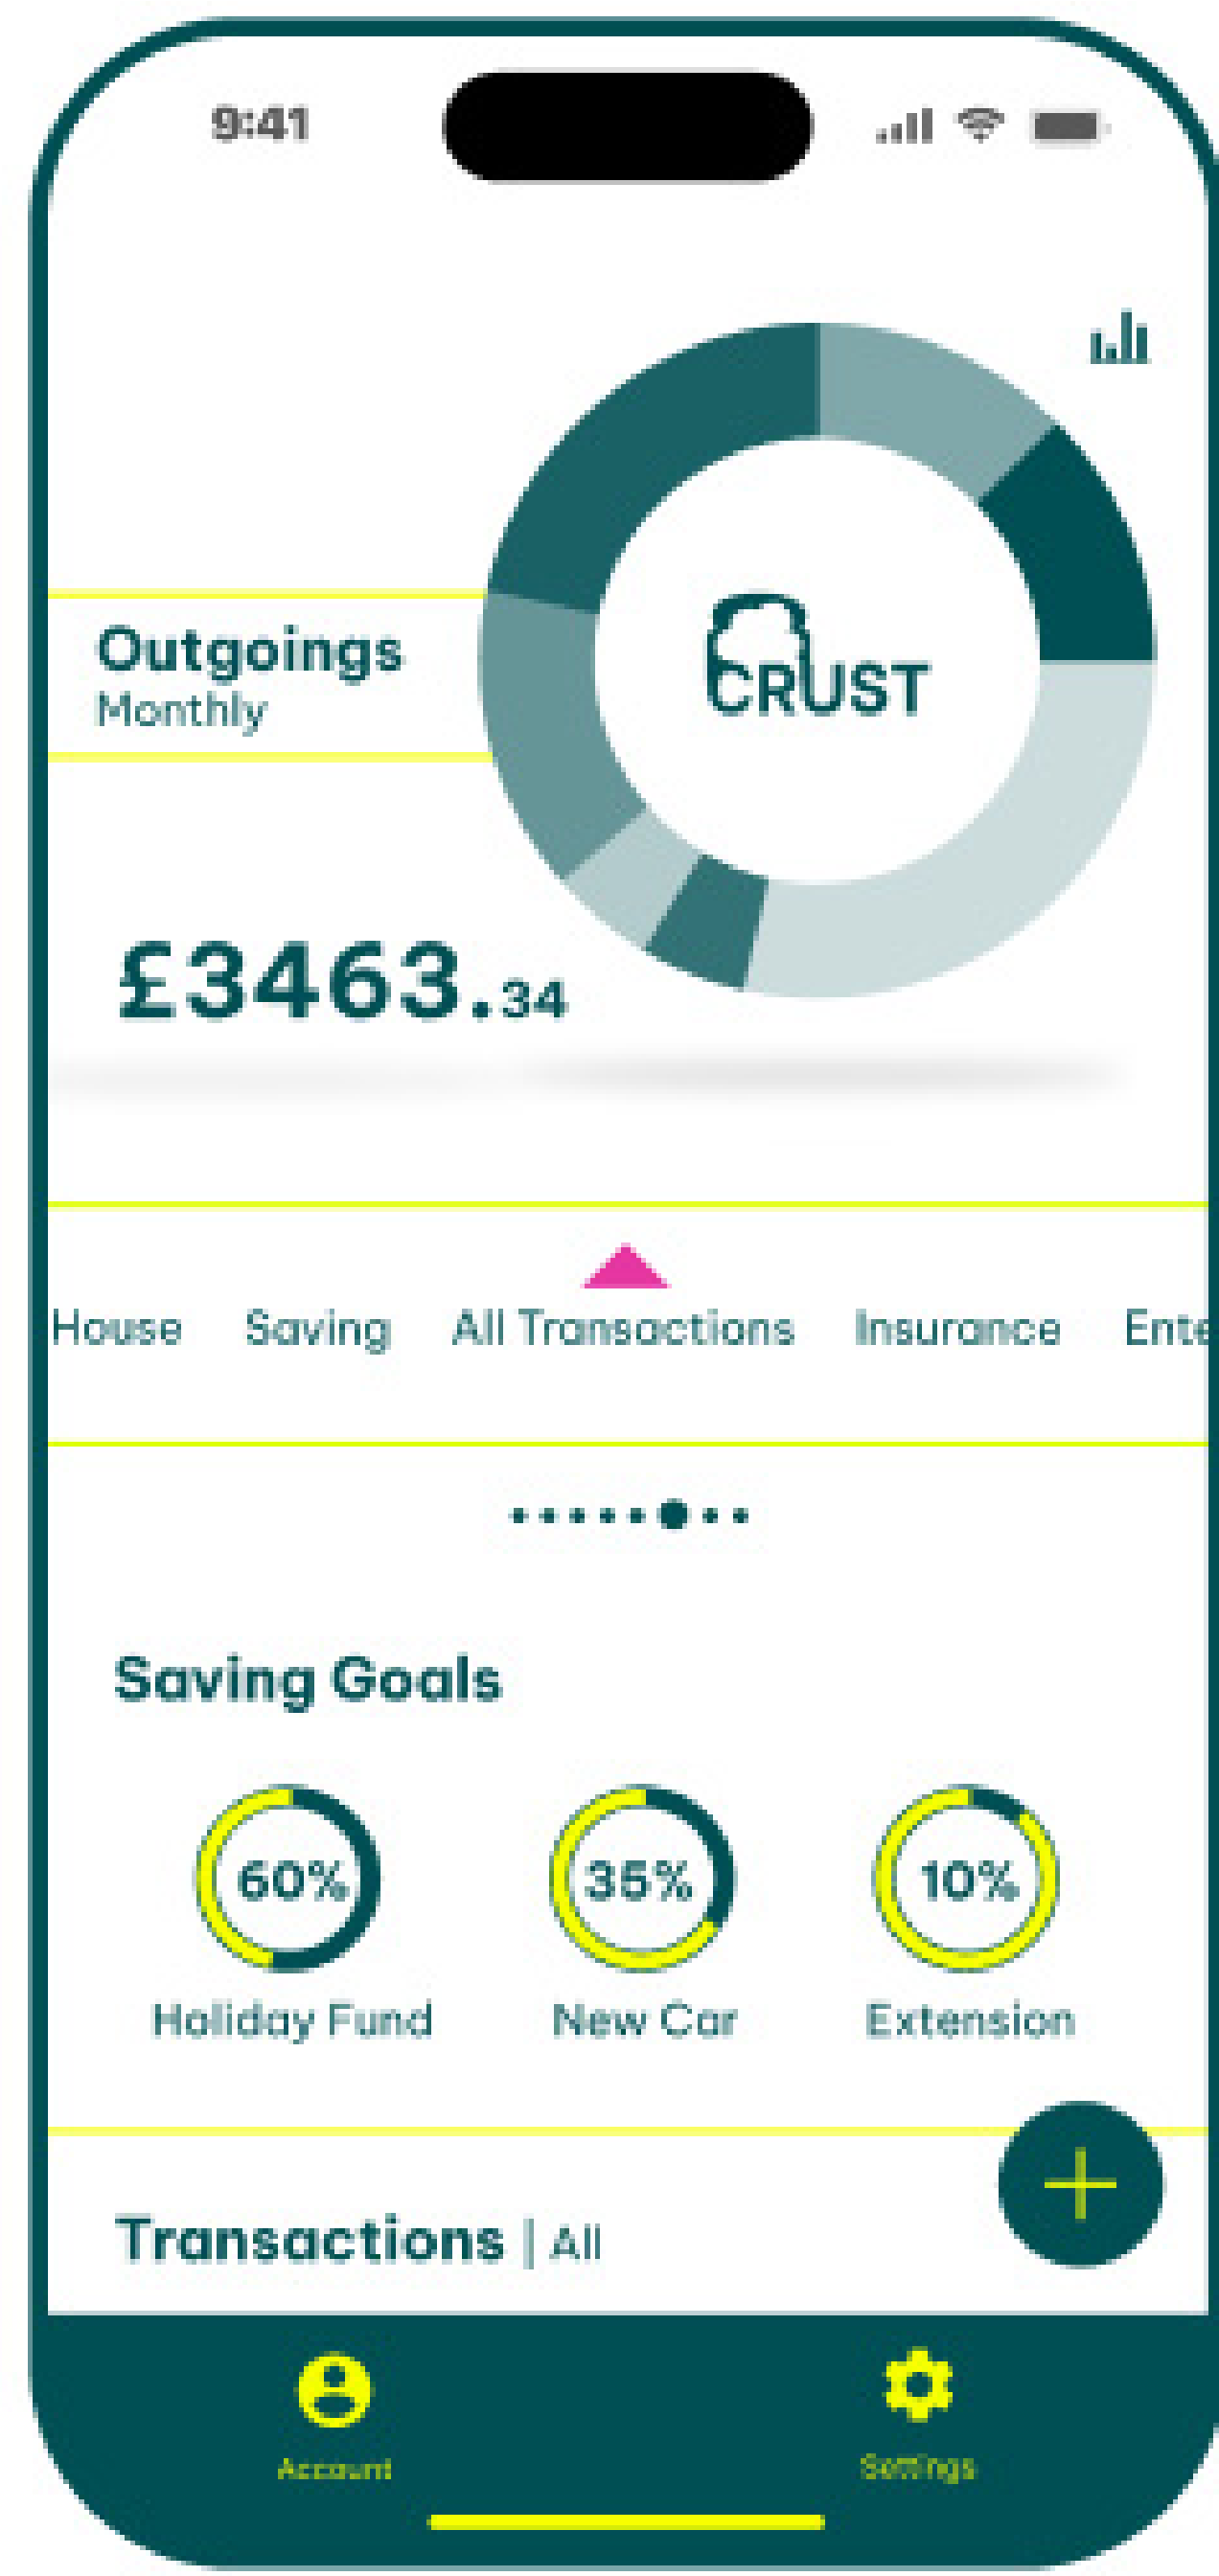

- ▶ **Honsa Take Away**
Revisit the horizontal slider and try to make it more obvious that is slides

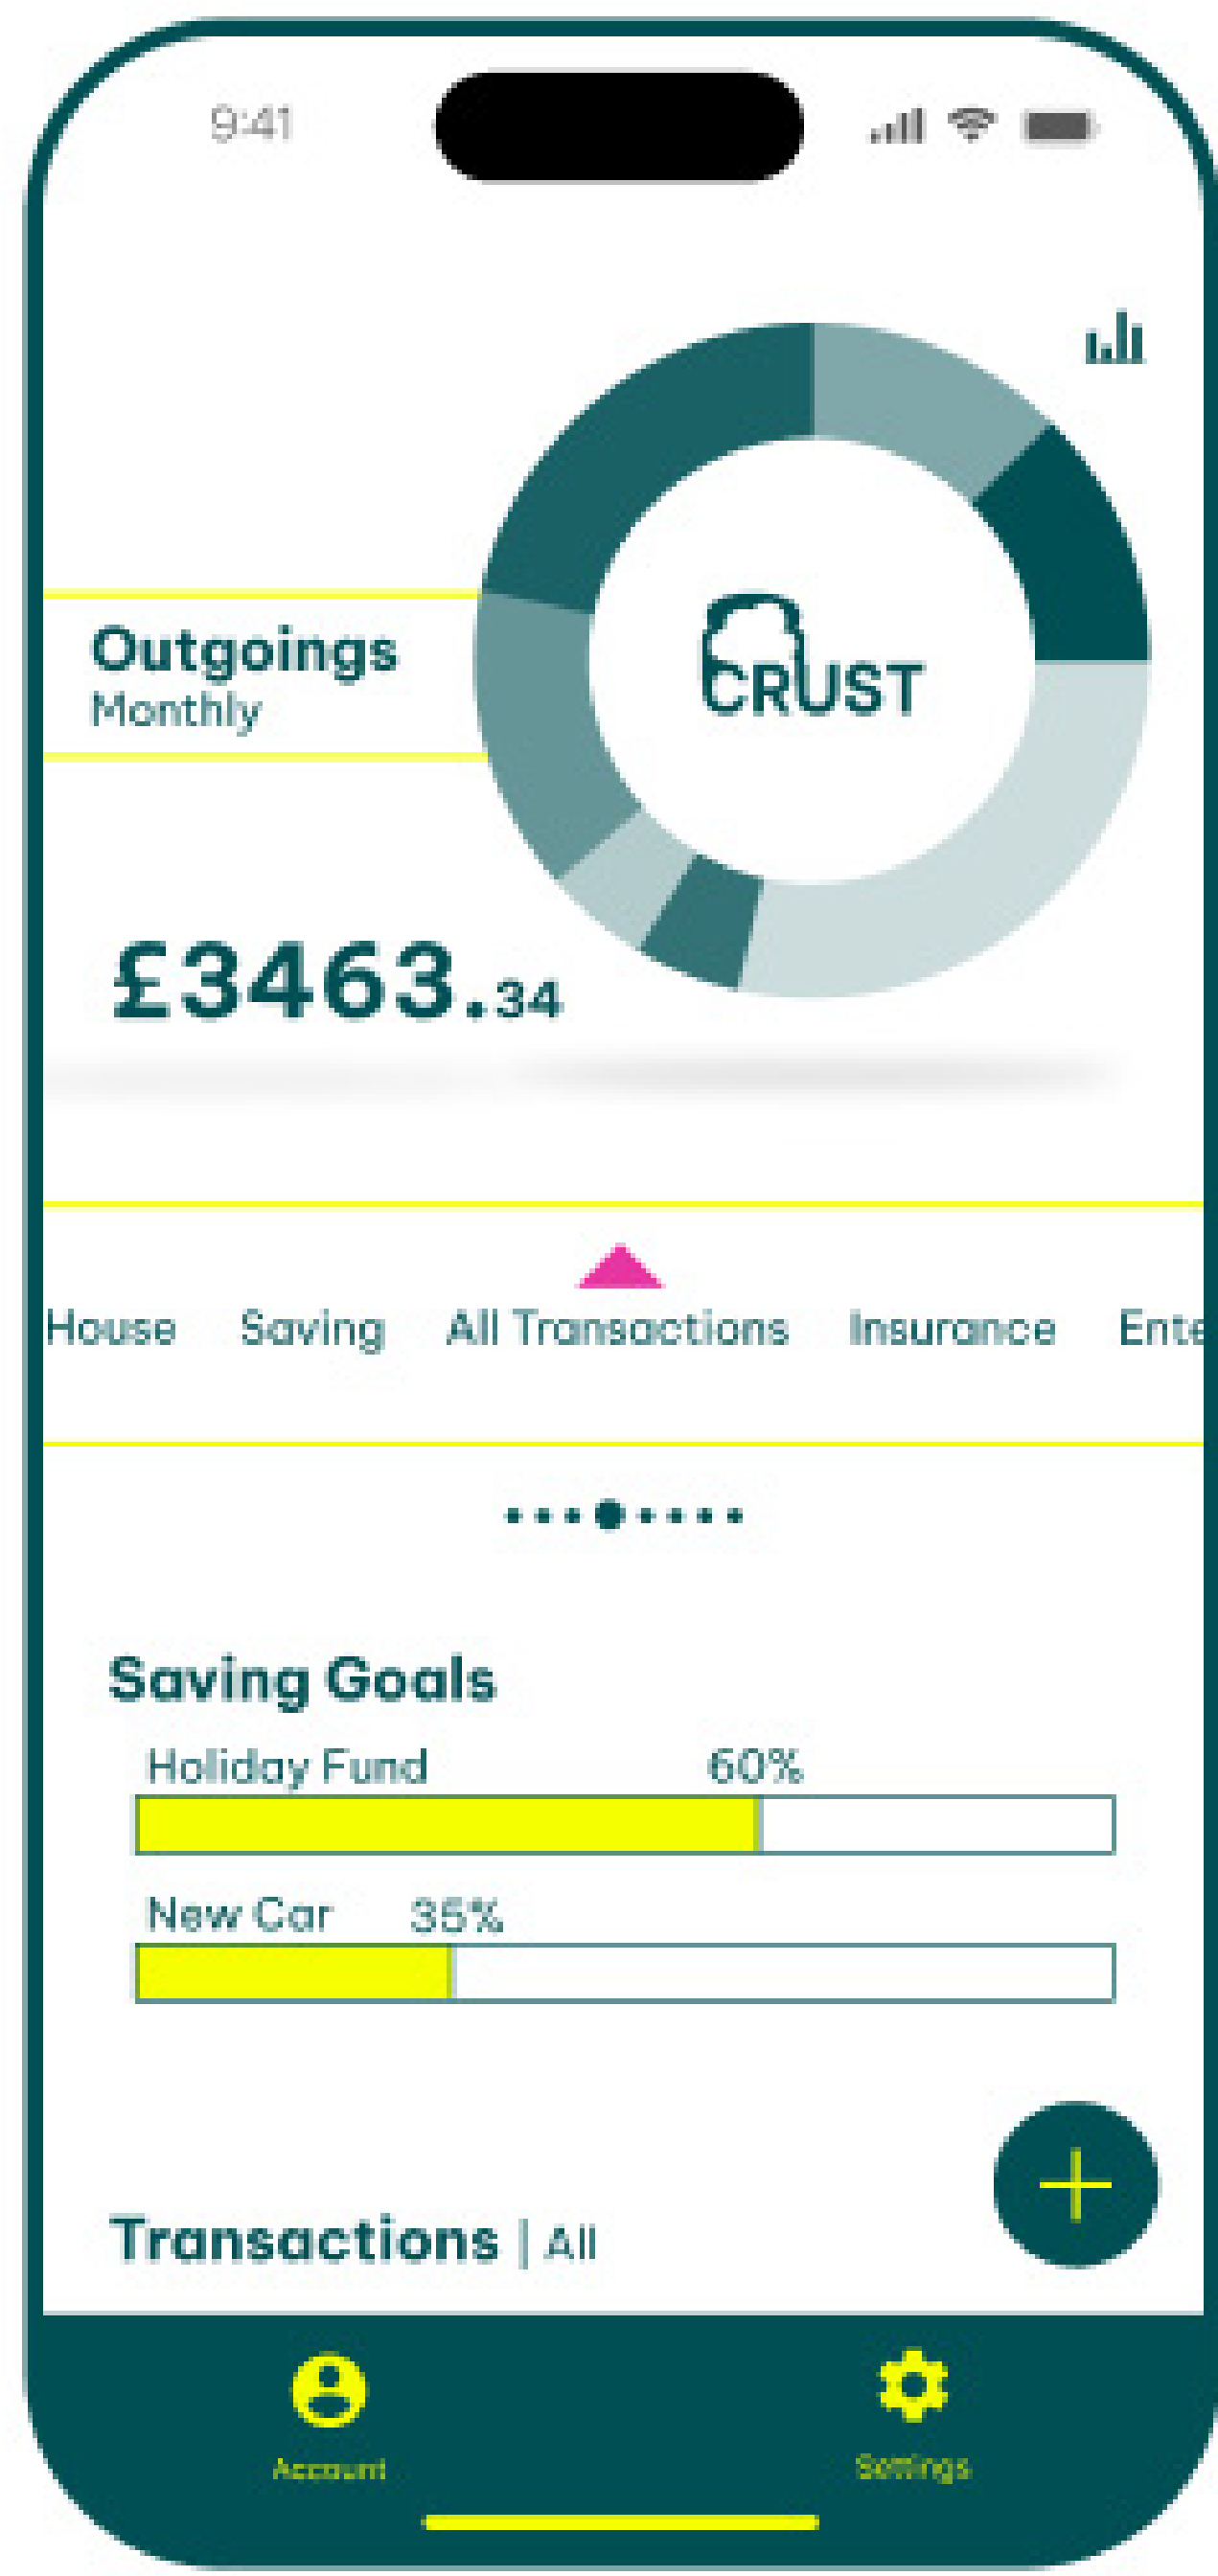

High Fidelity Colour

Preference Test

Option A

Option B

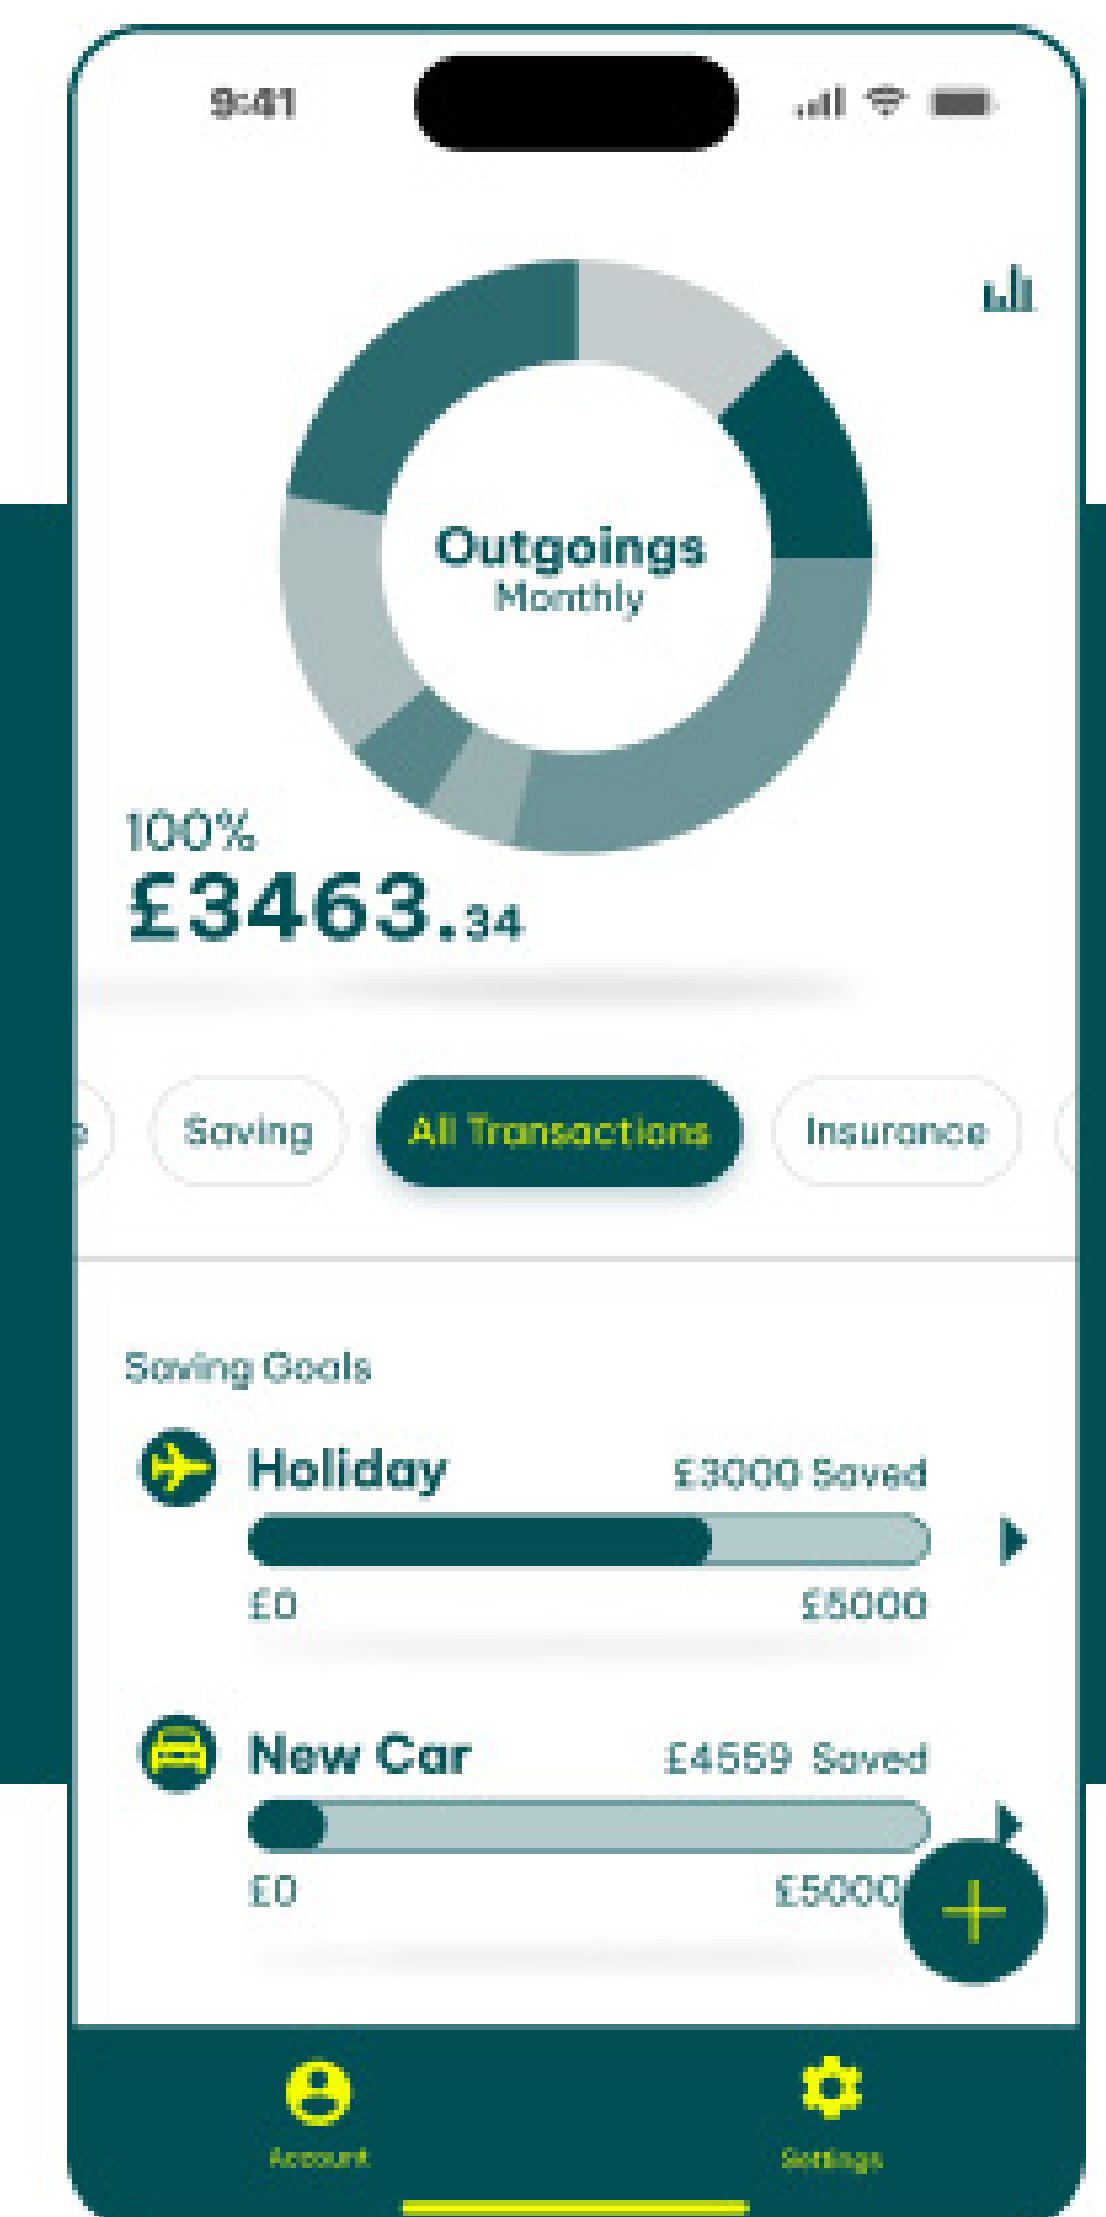

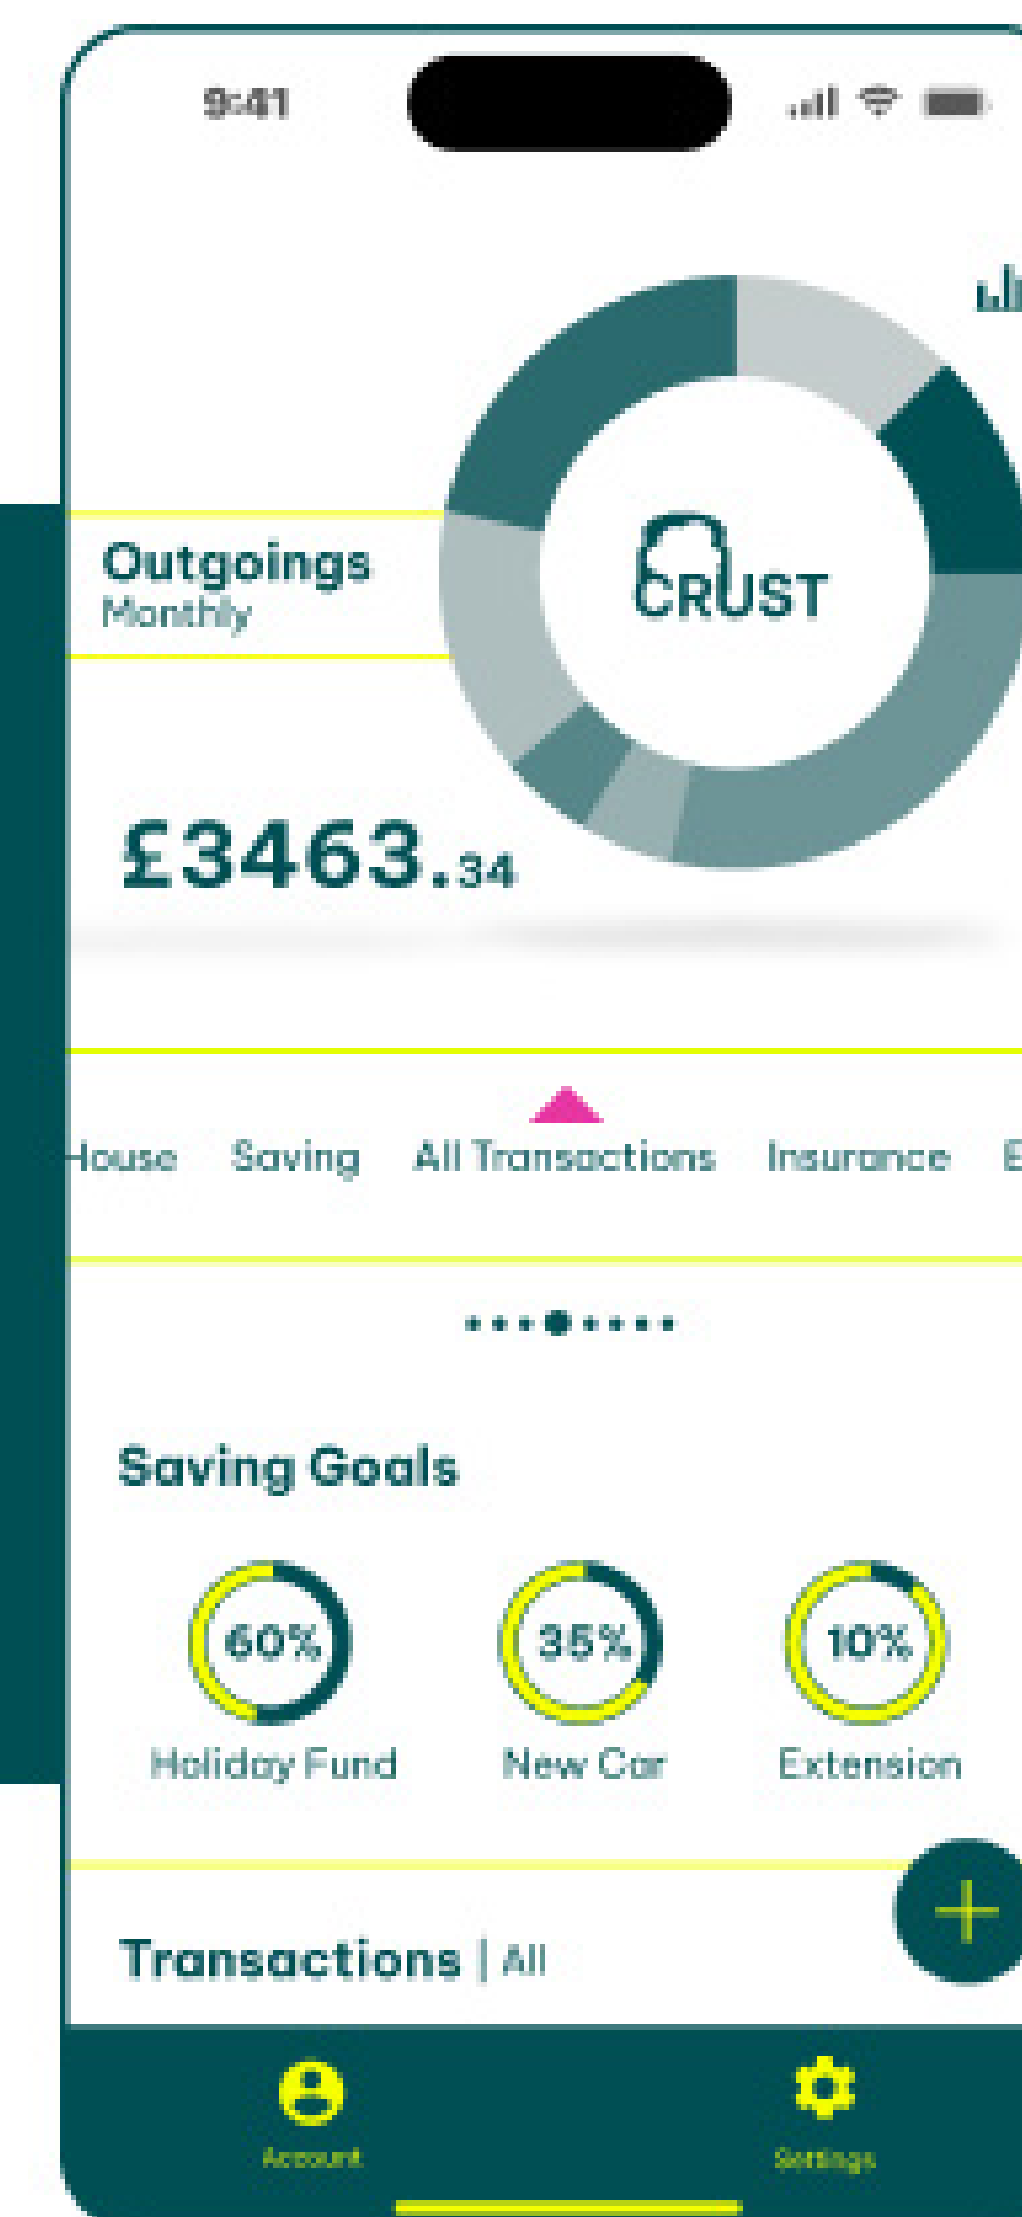

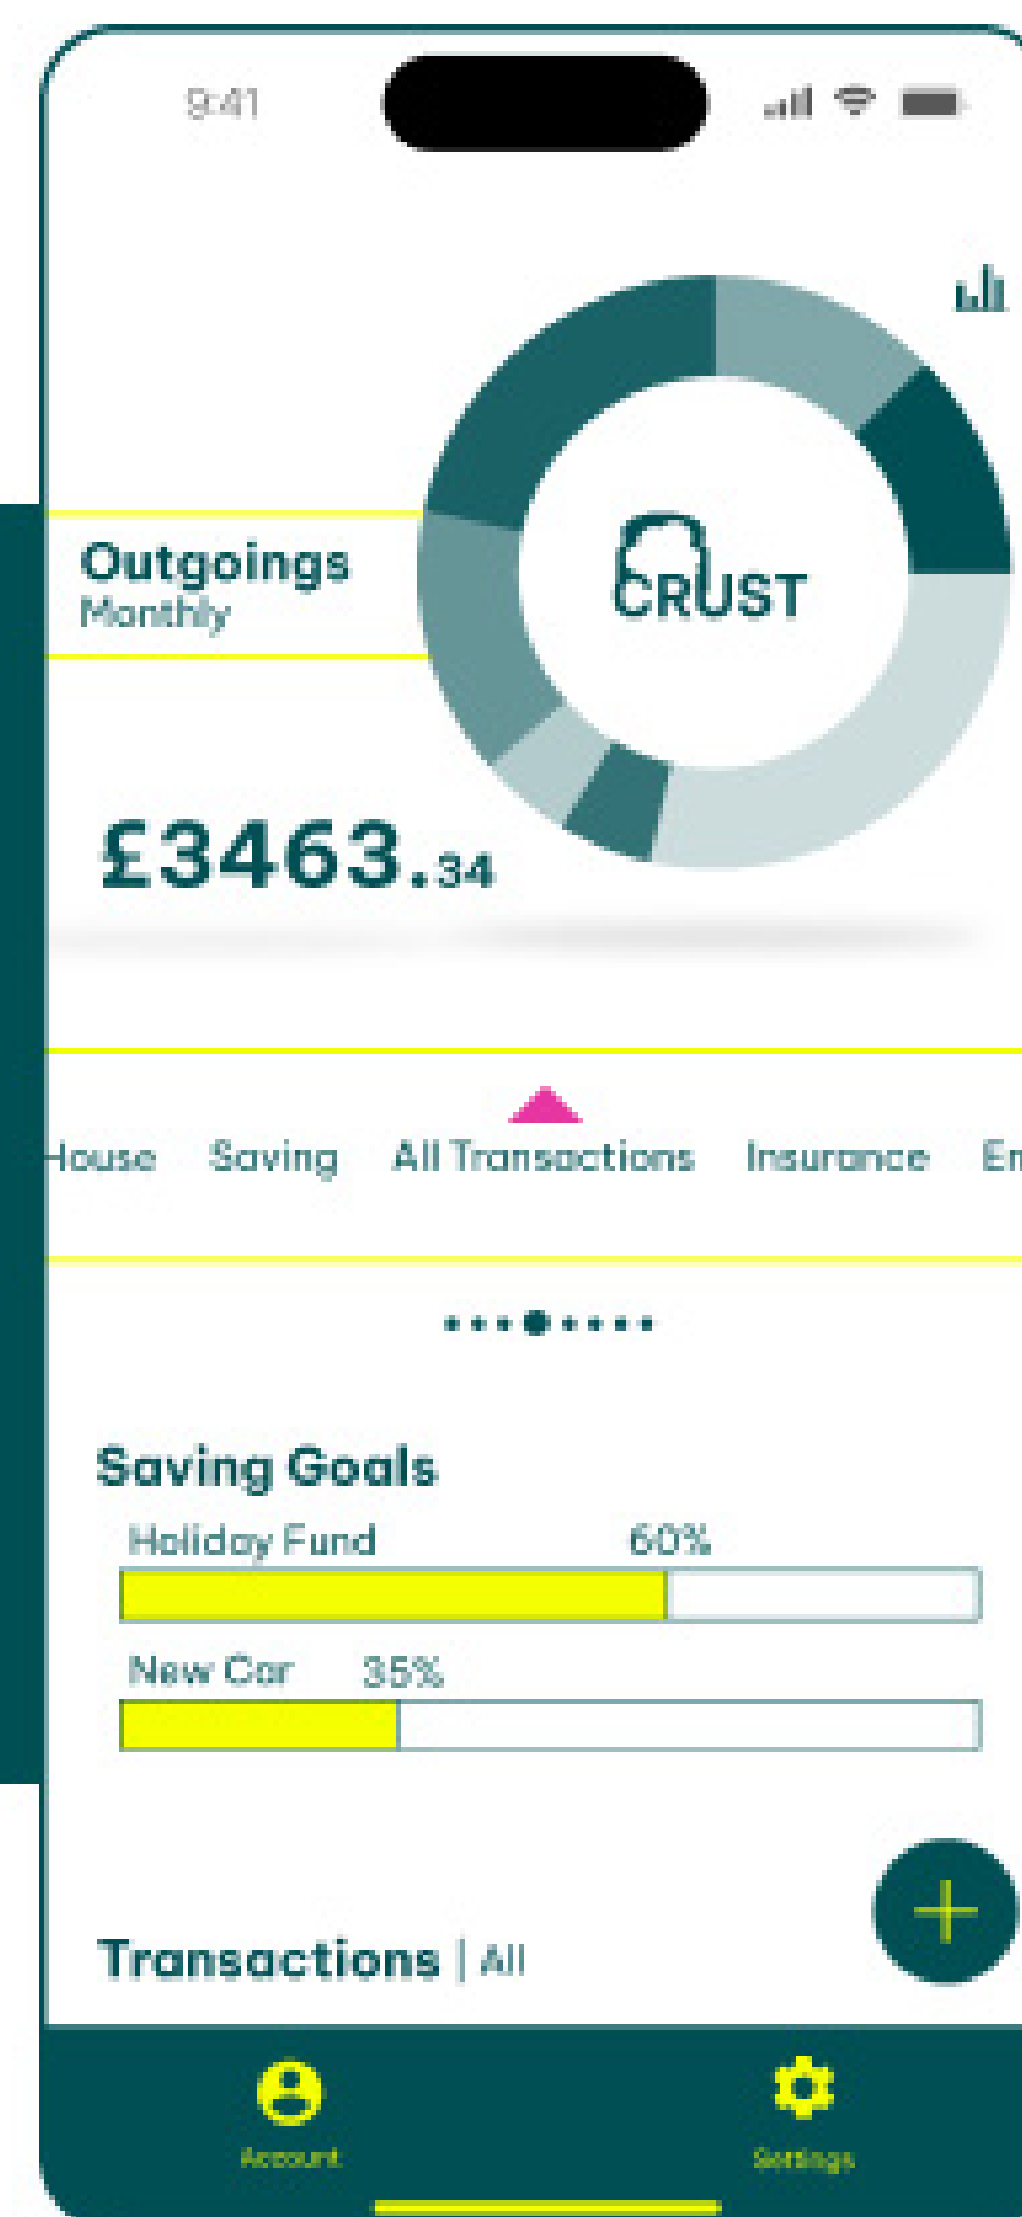

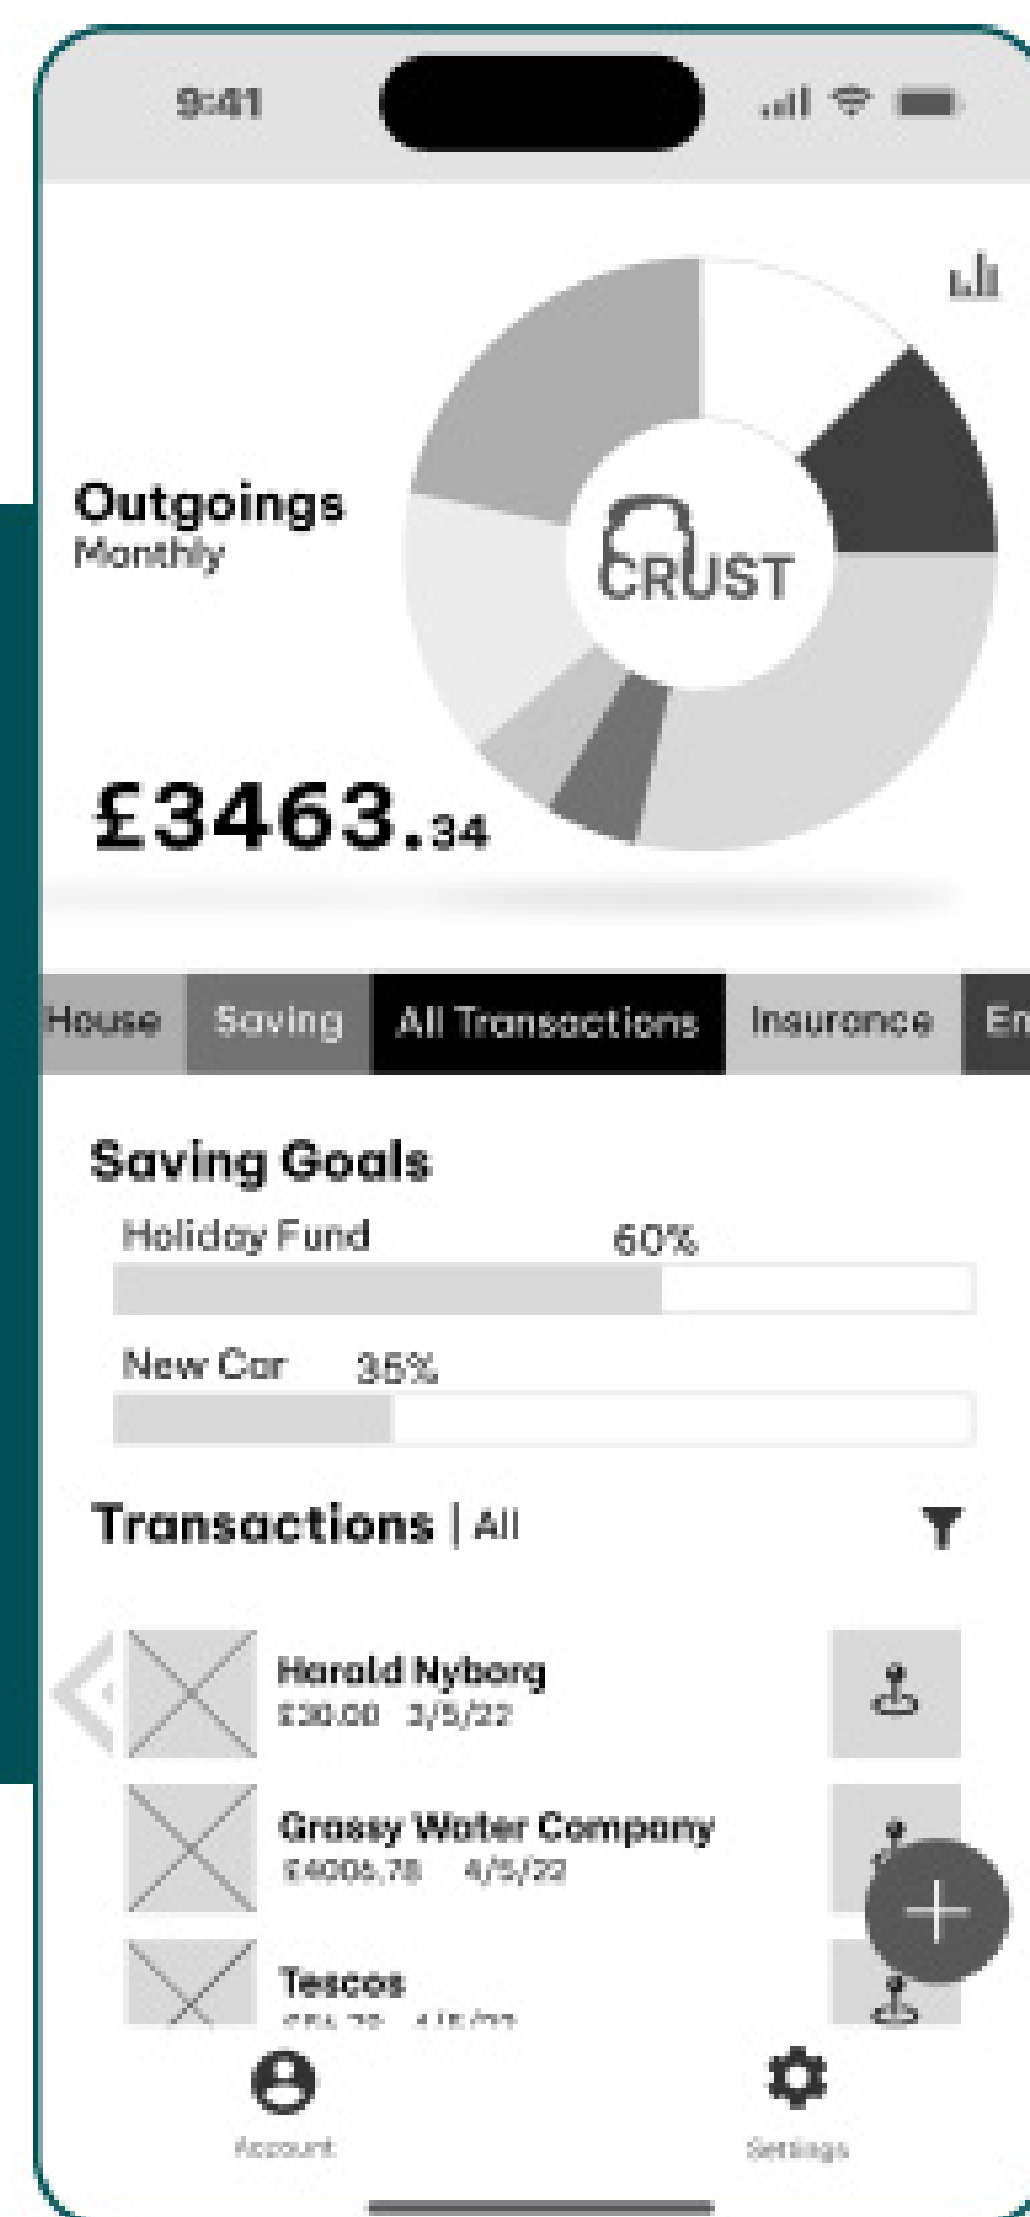

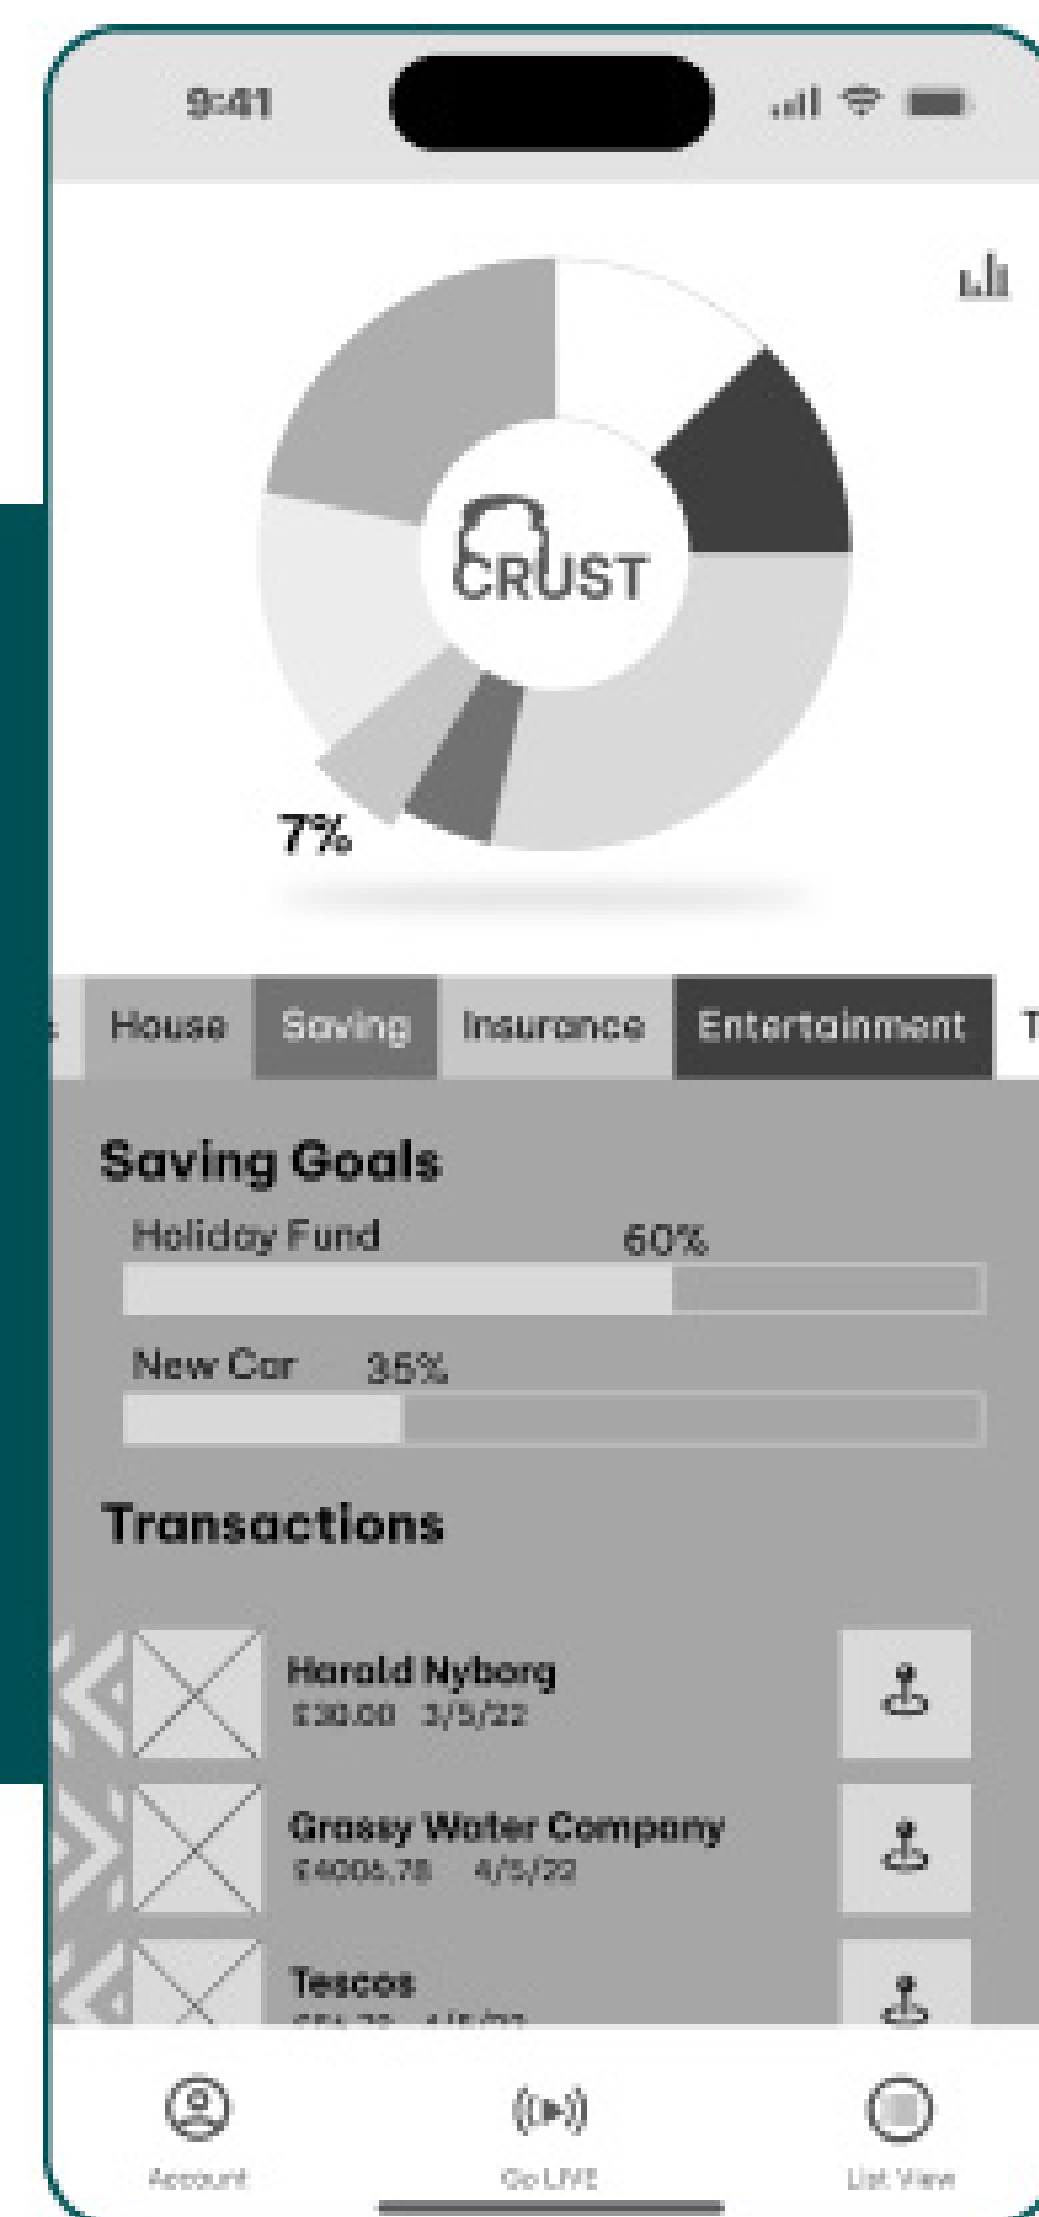

6 Out Of 10 Participants Preferred Option B

It was a close call but users chose option B stating that they found the information easier to digest even though the circle maybe aesthetically more pleasing

Final Designs

A Savings App For Targeted Savers

Although asavers app the usr flow focus on the ability to edit and interact with transactions so whilst saving was a feature it function prodominently like a banking app

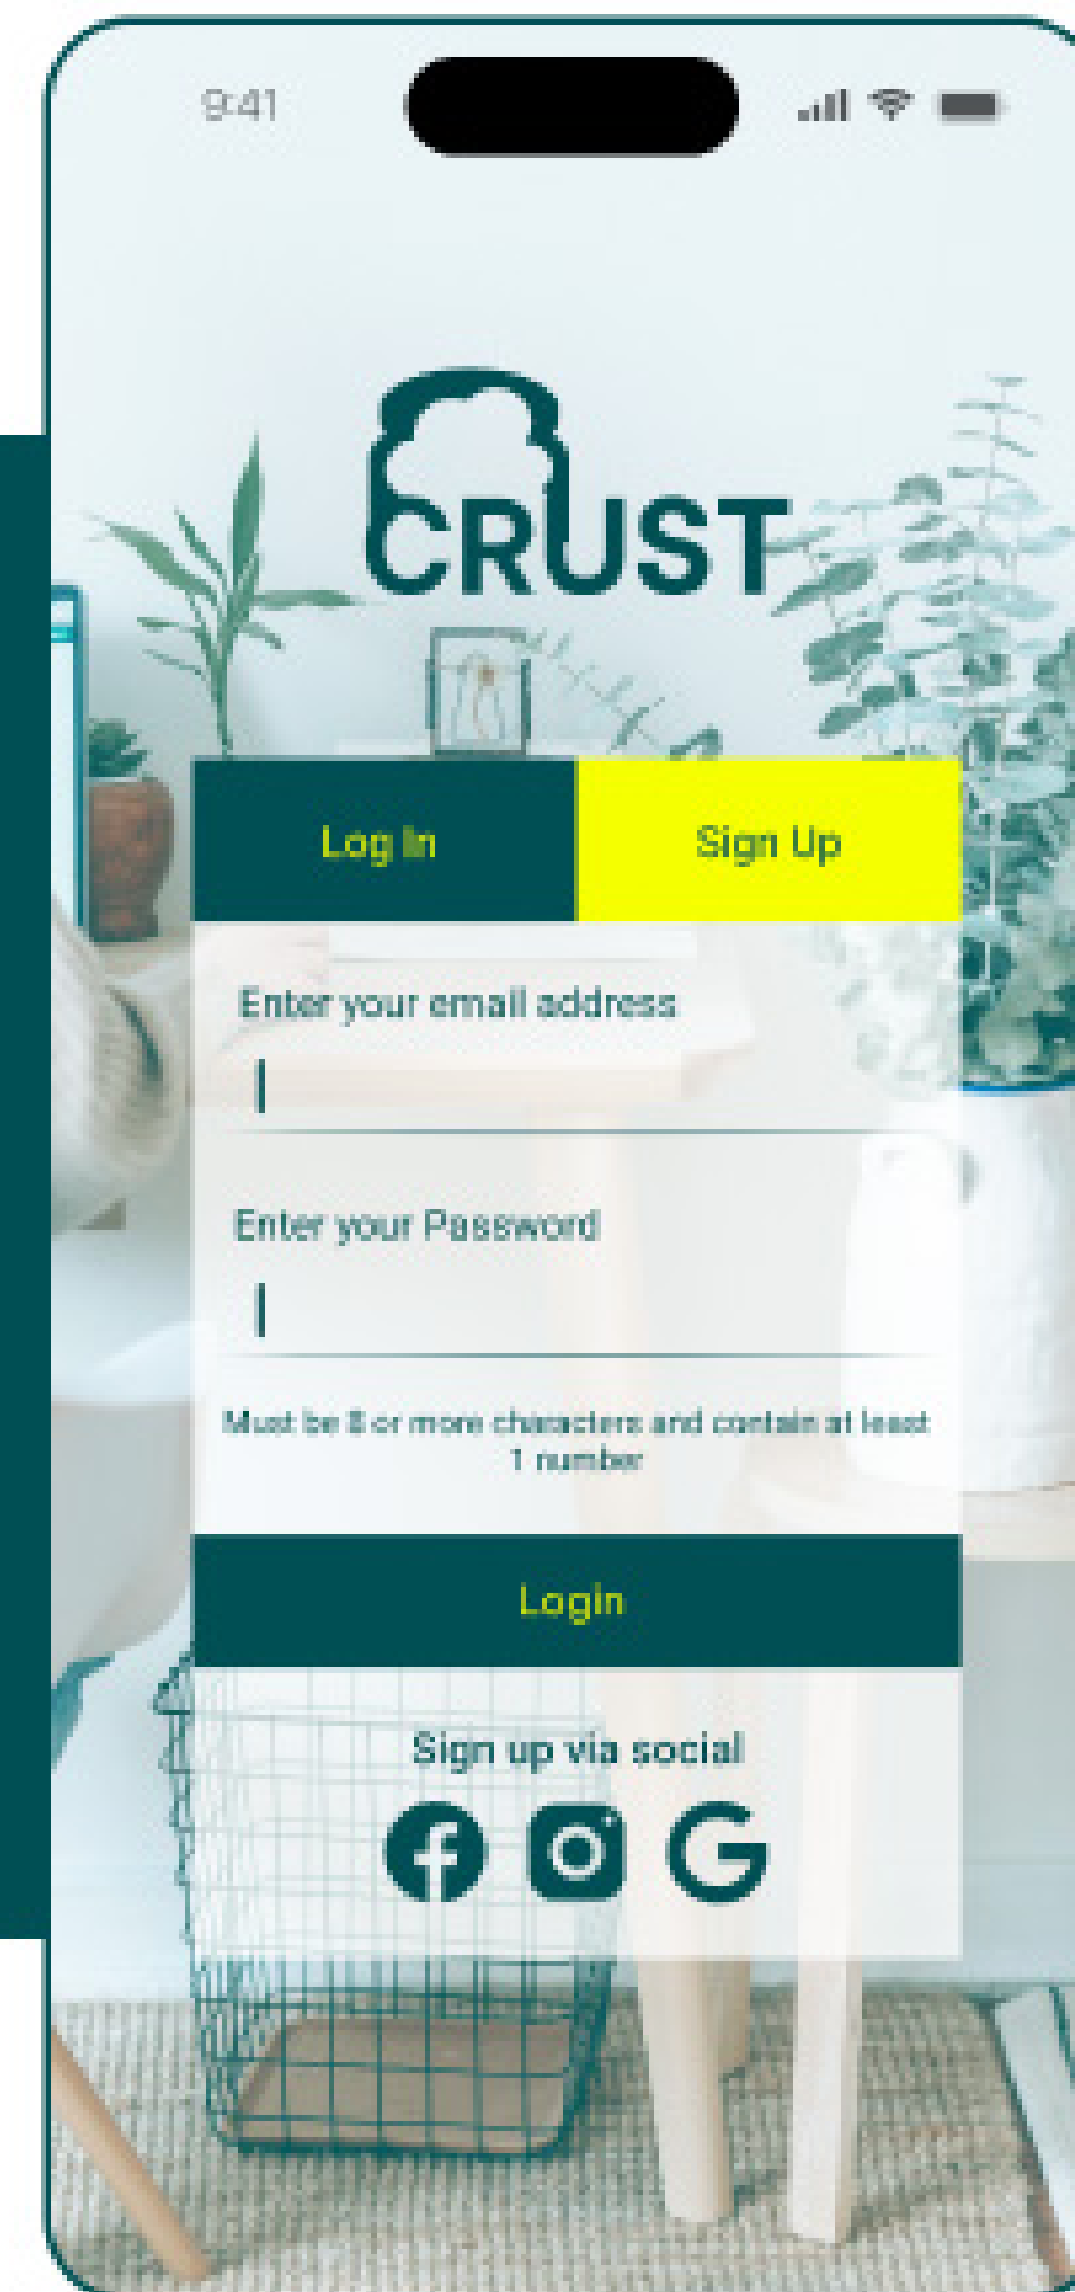

Homepage

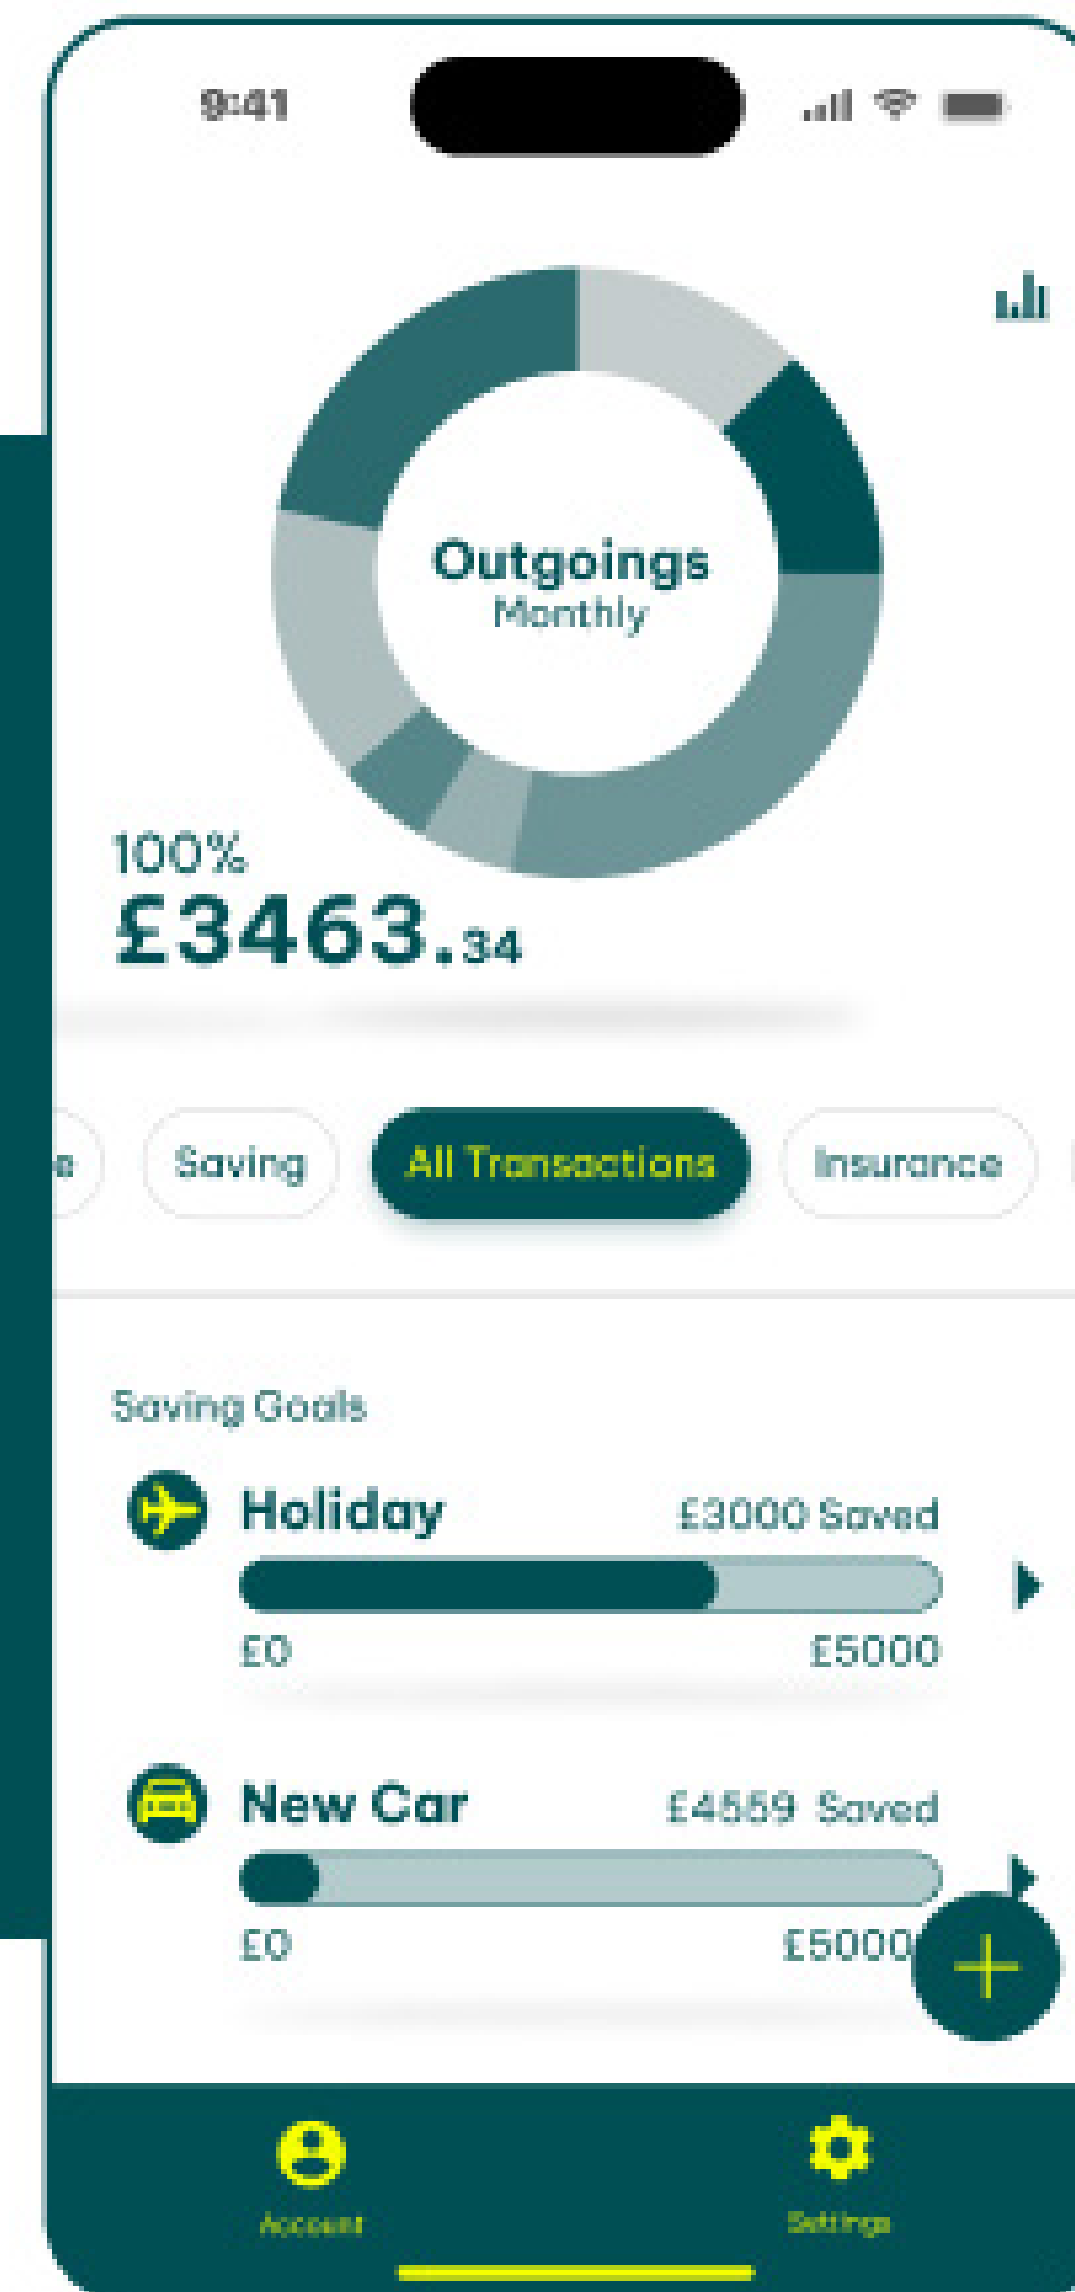

User Flow

"As a money-saver, I need to be able to input information on the money I am receiving and spending (and on what), so that I can see an overview of my finances."

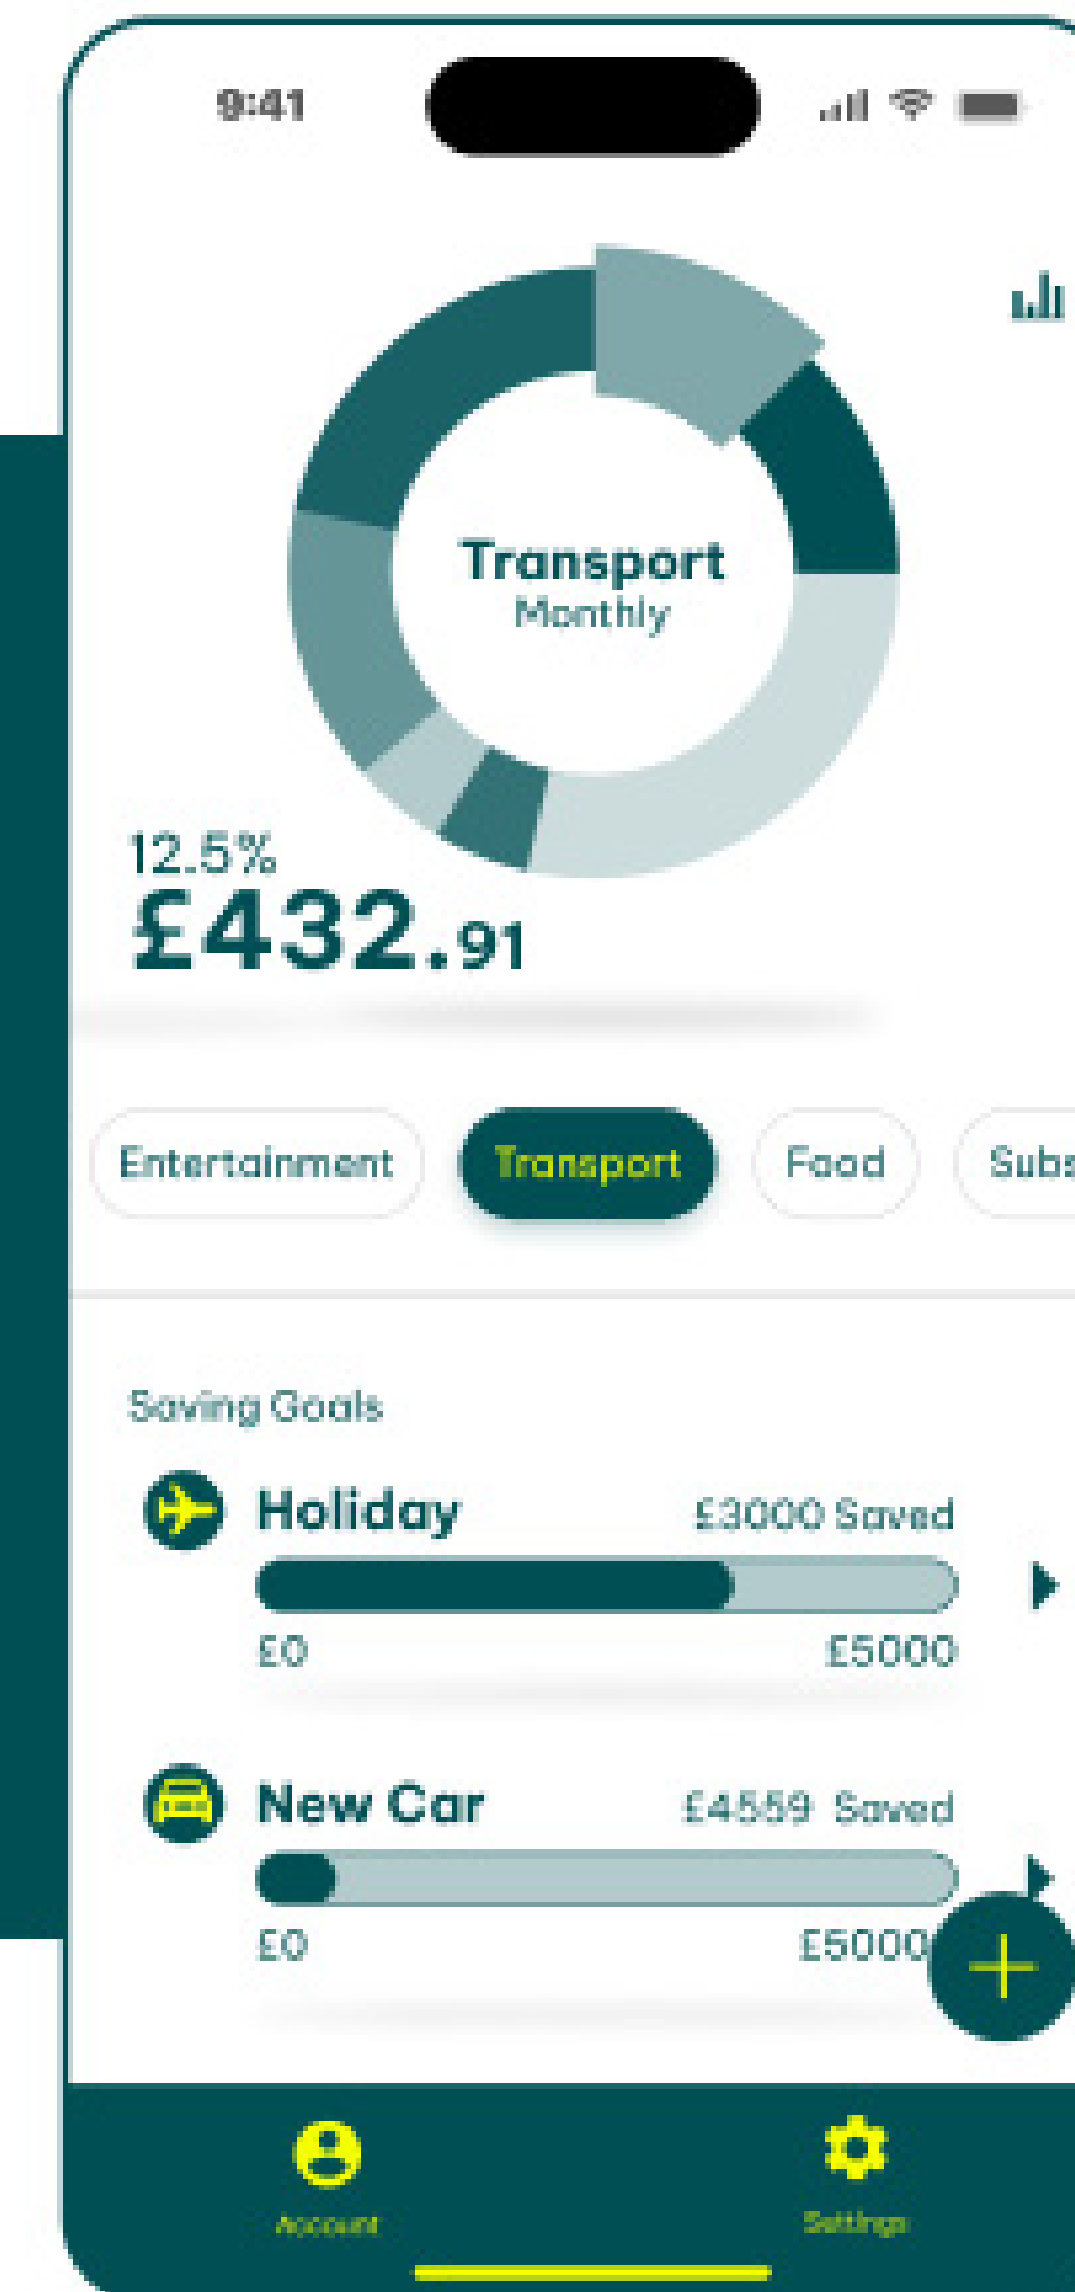

Login

Enter login in details and login

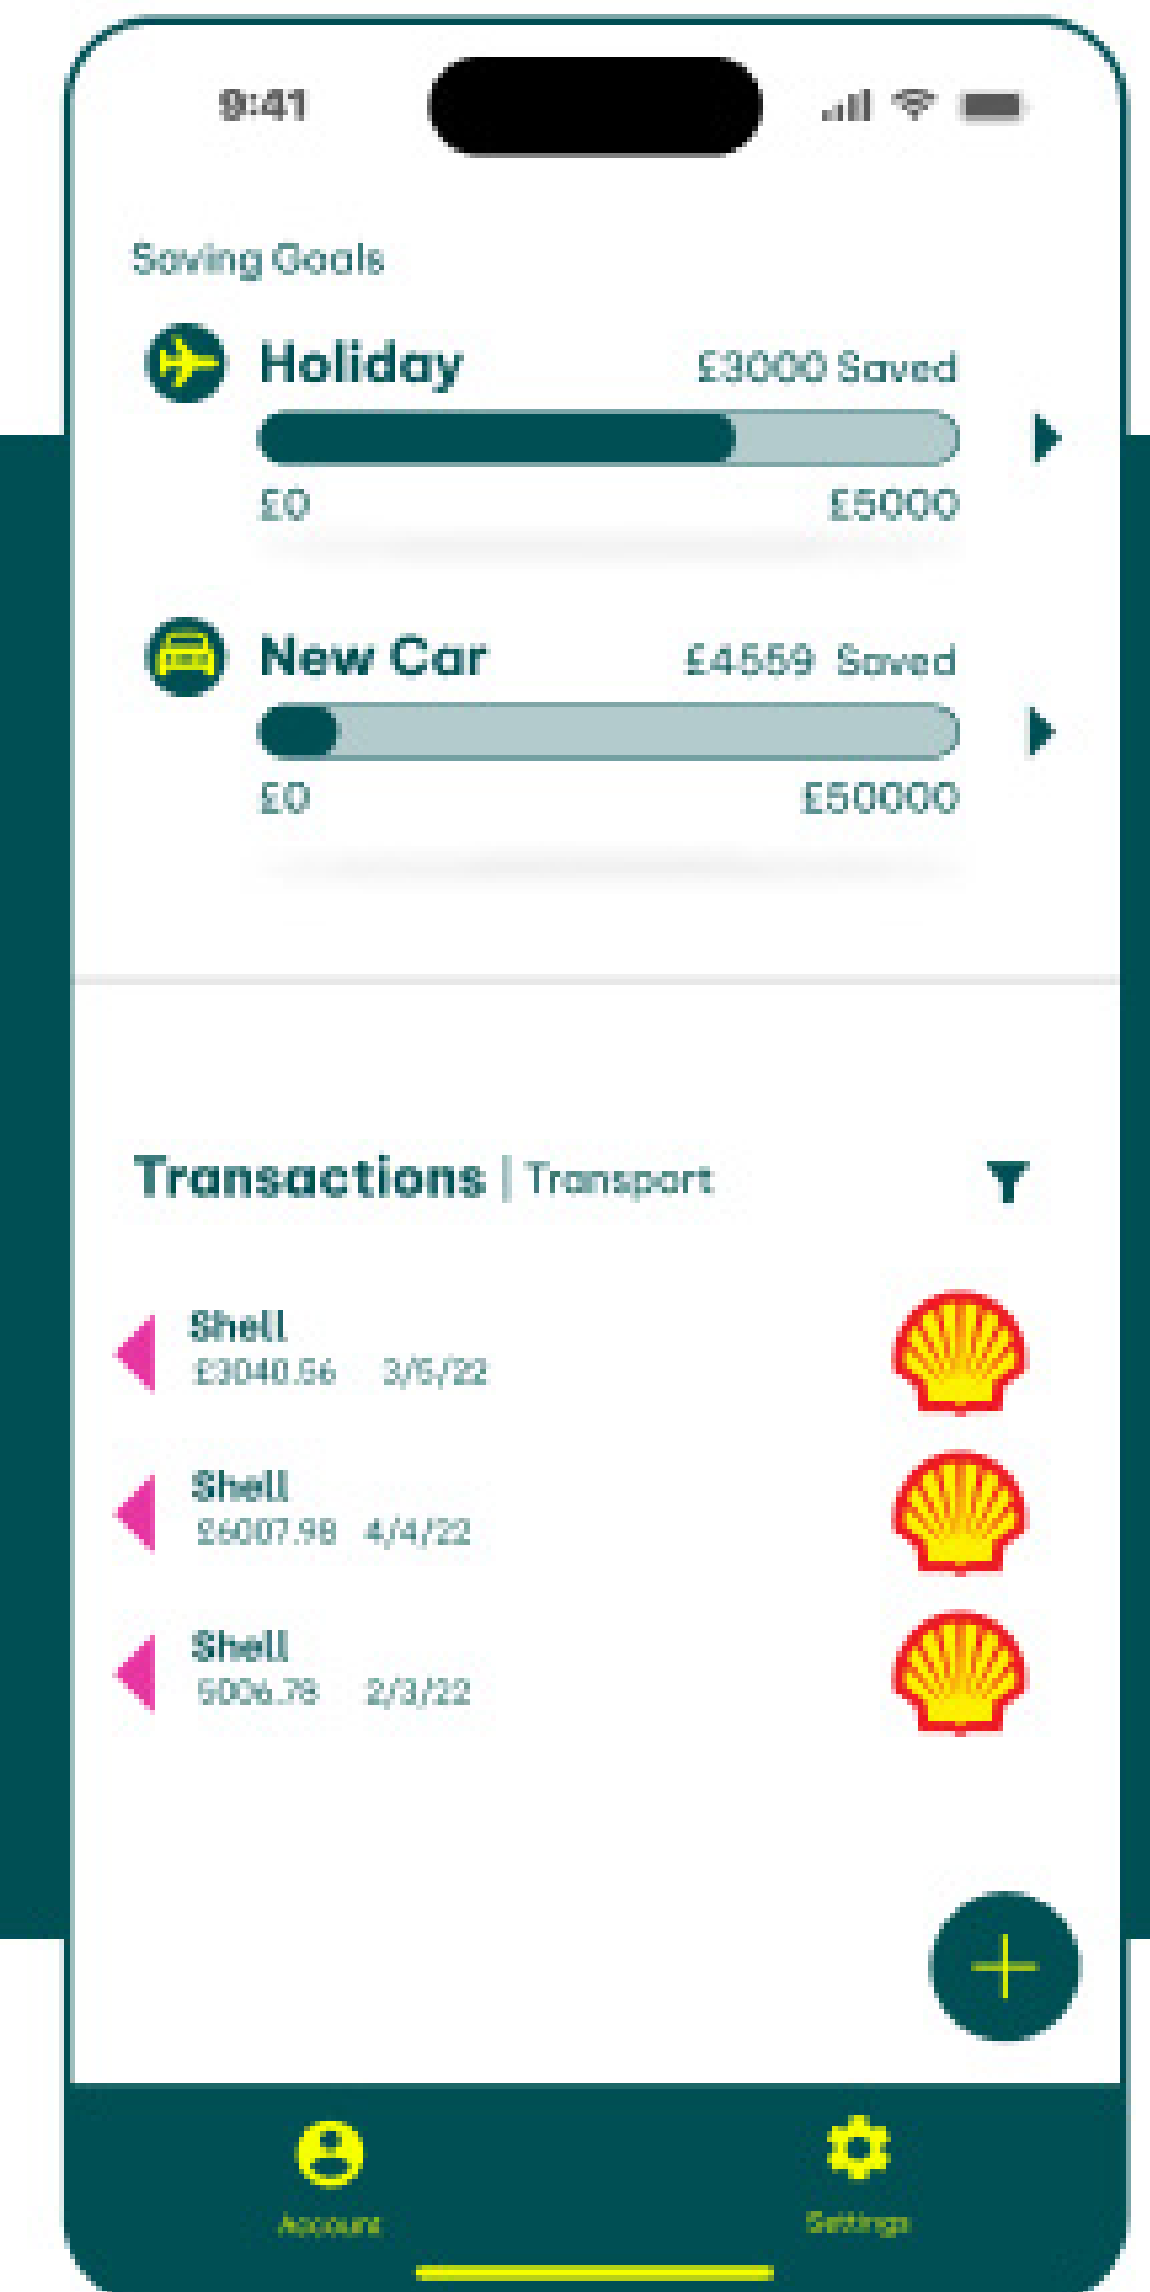

Homepage

Land on home page.
Transaction at the bottom

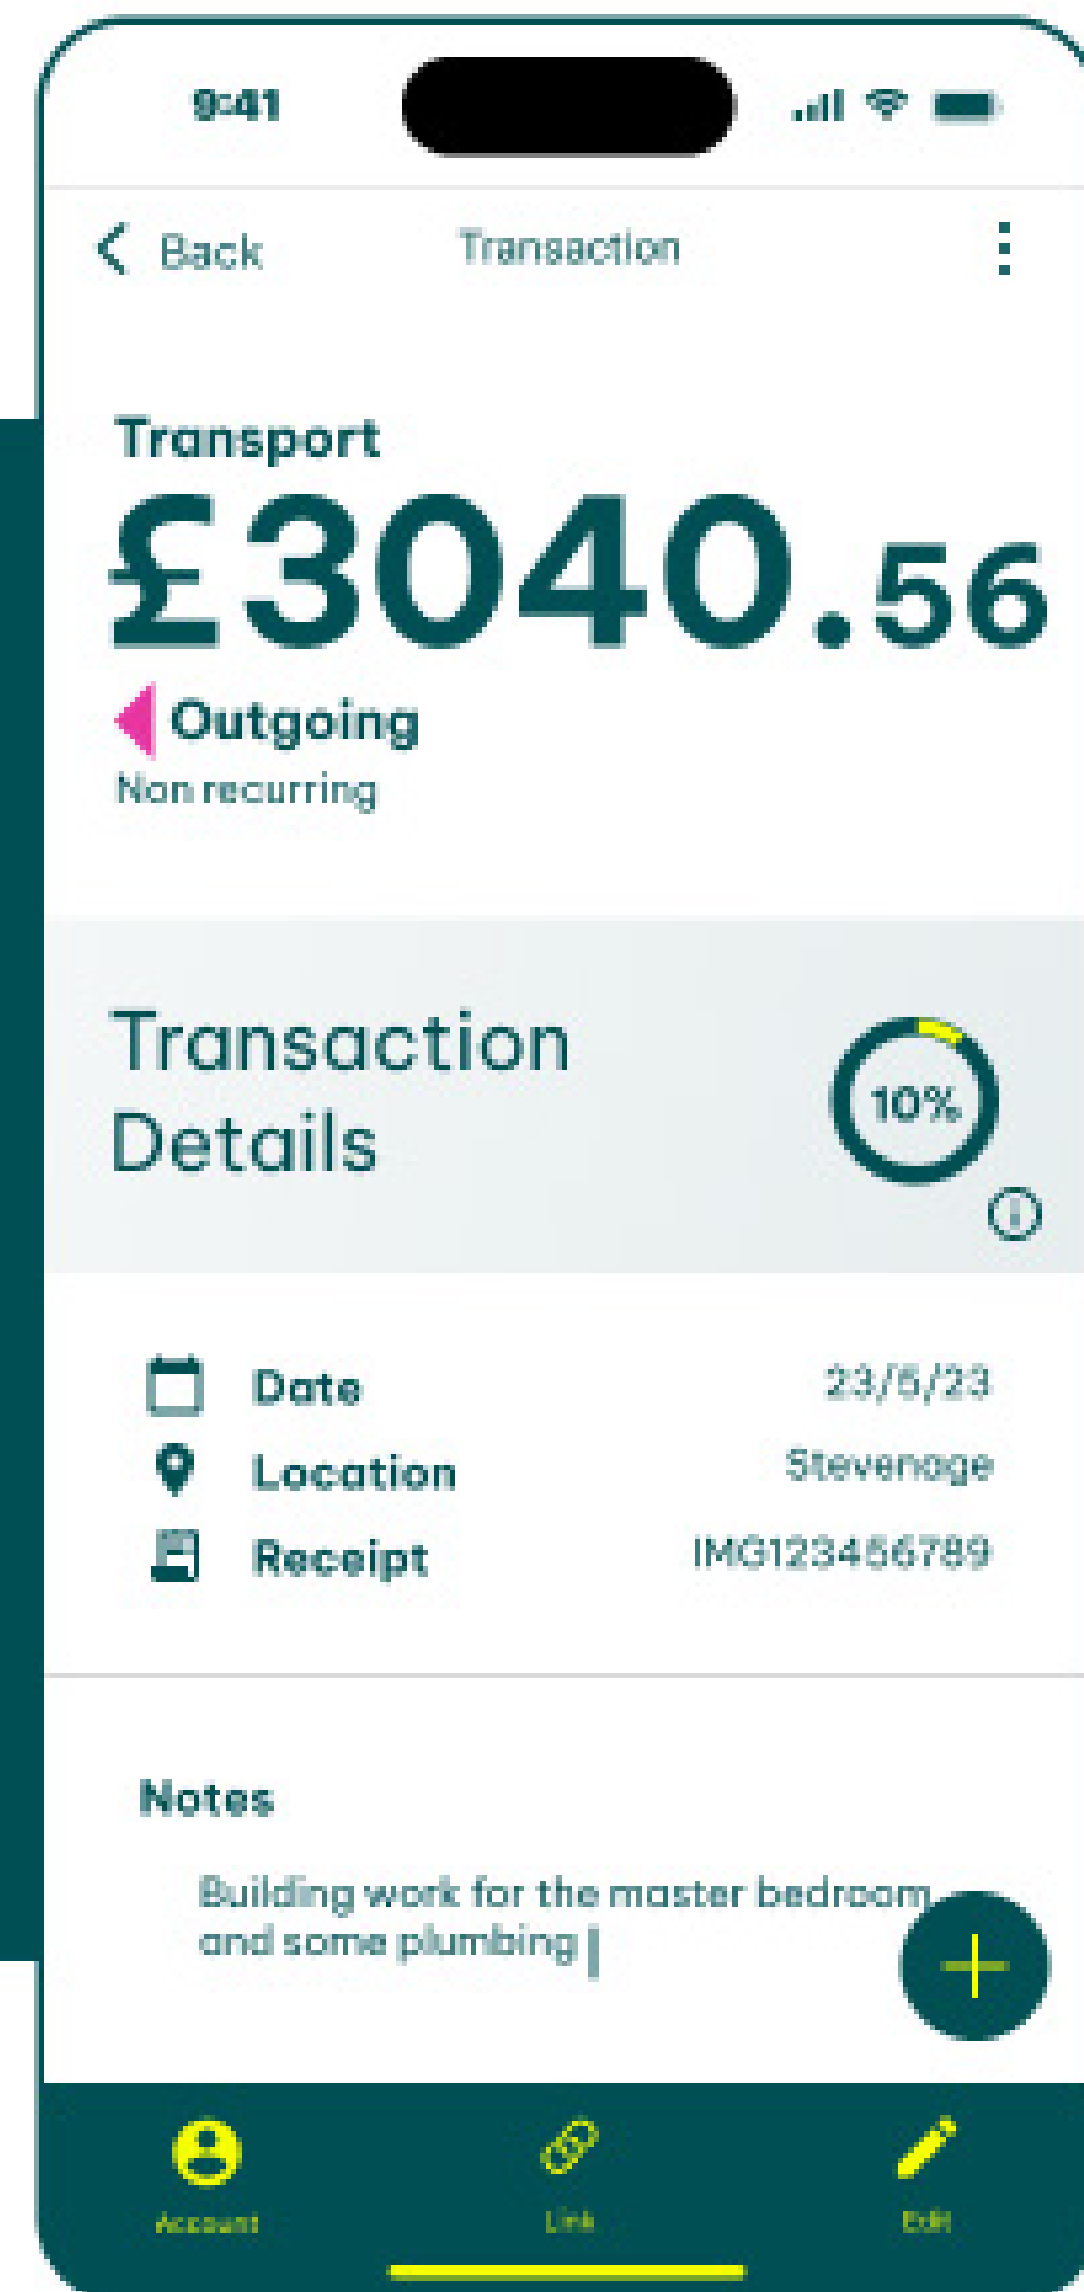

Homepage

Navigate to transport category on the slider

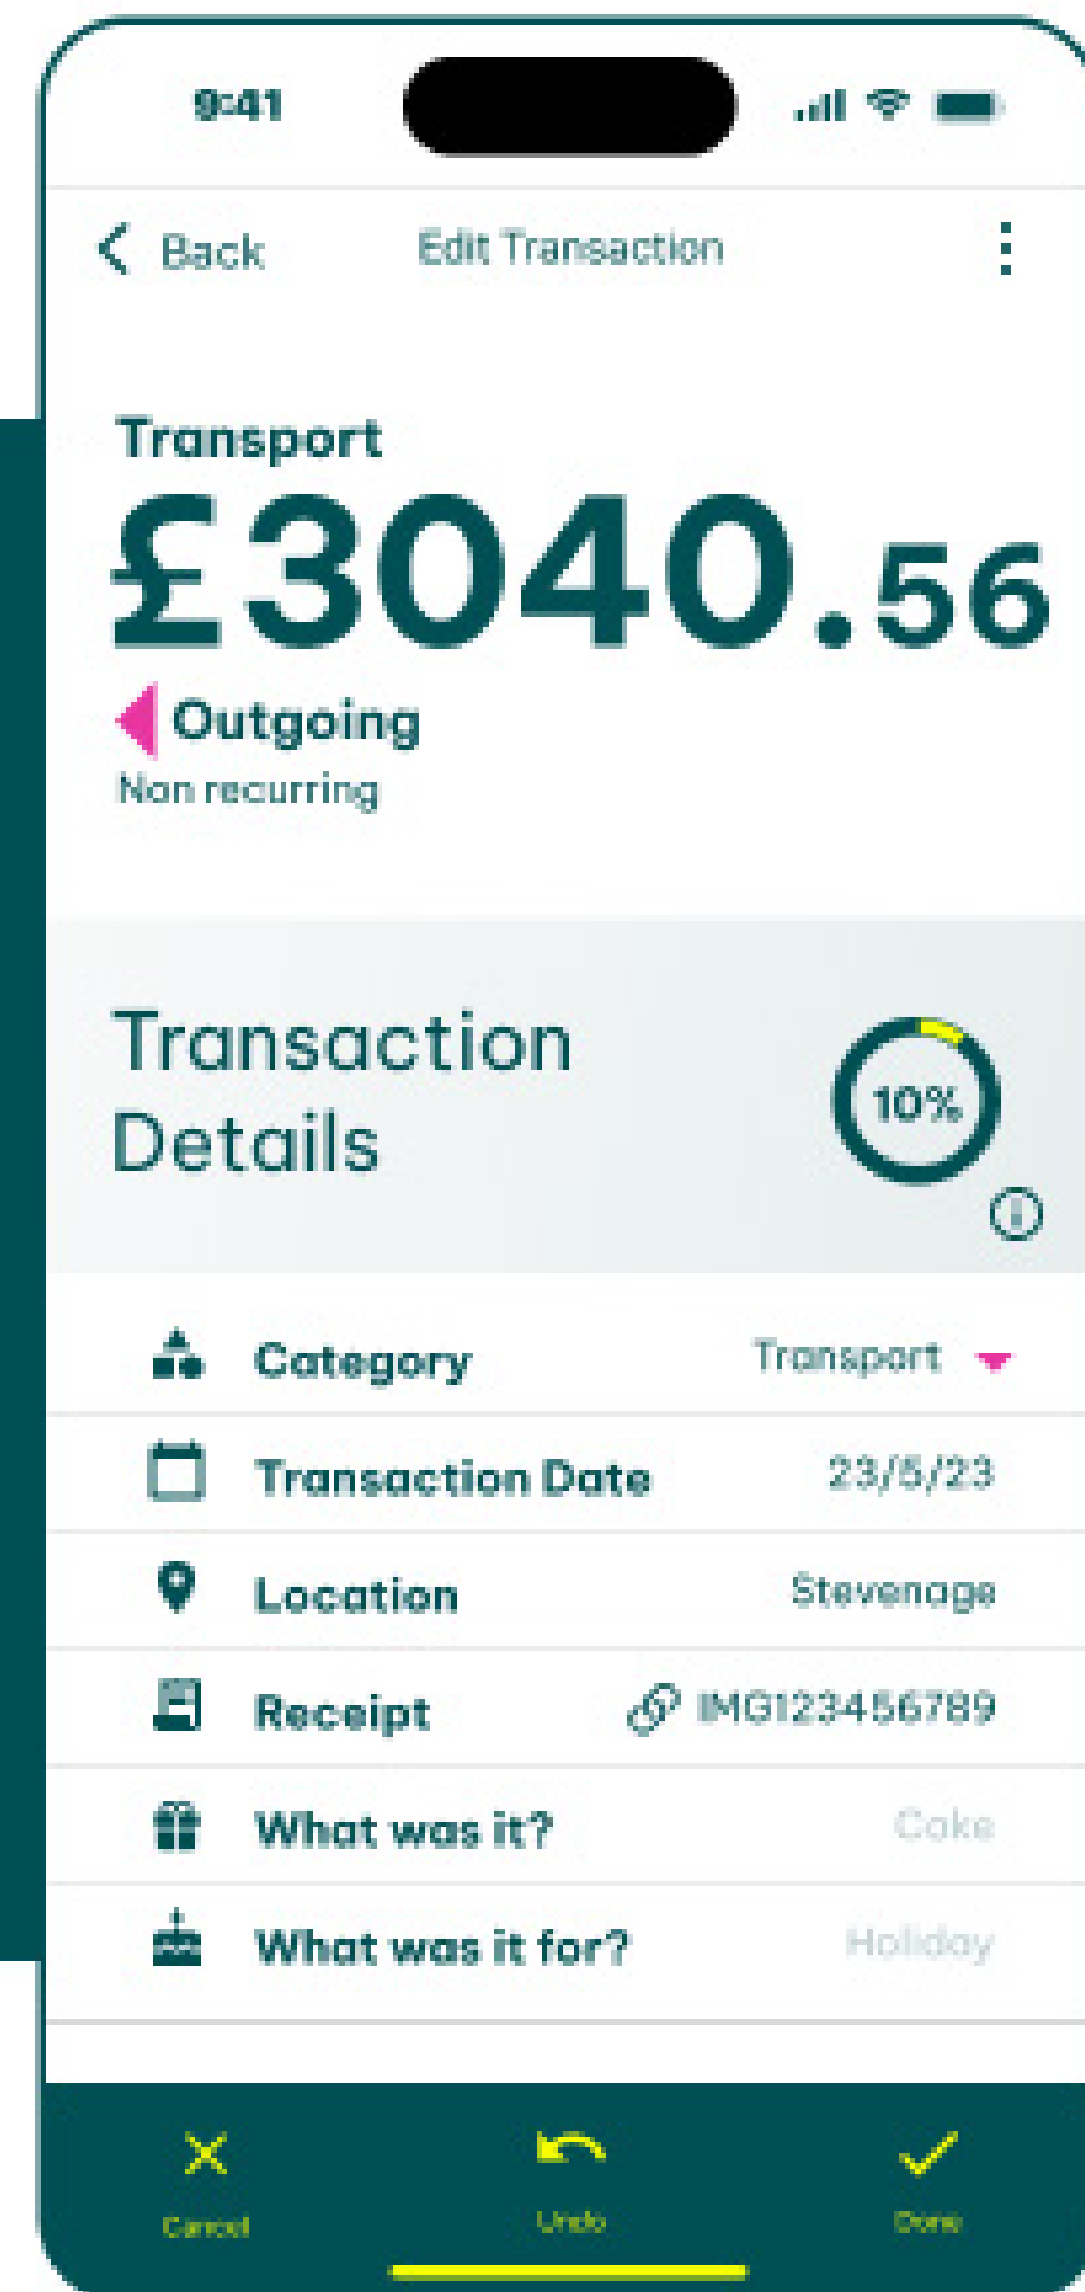

Homepage

Scroll down to see all transport transactions

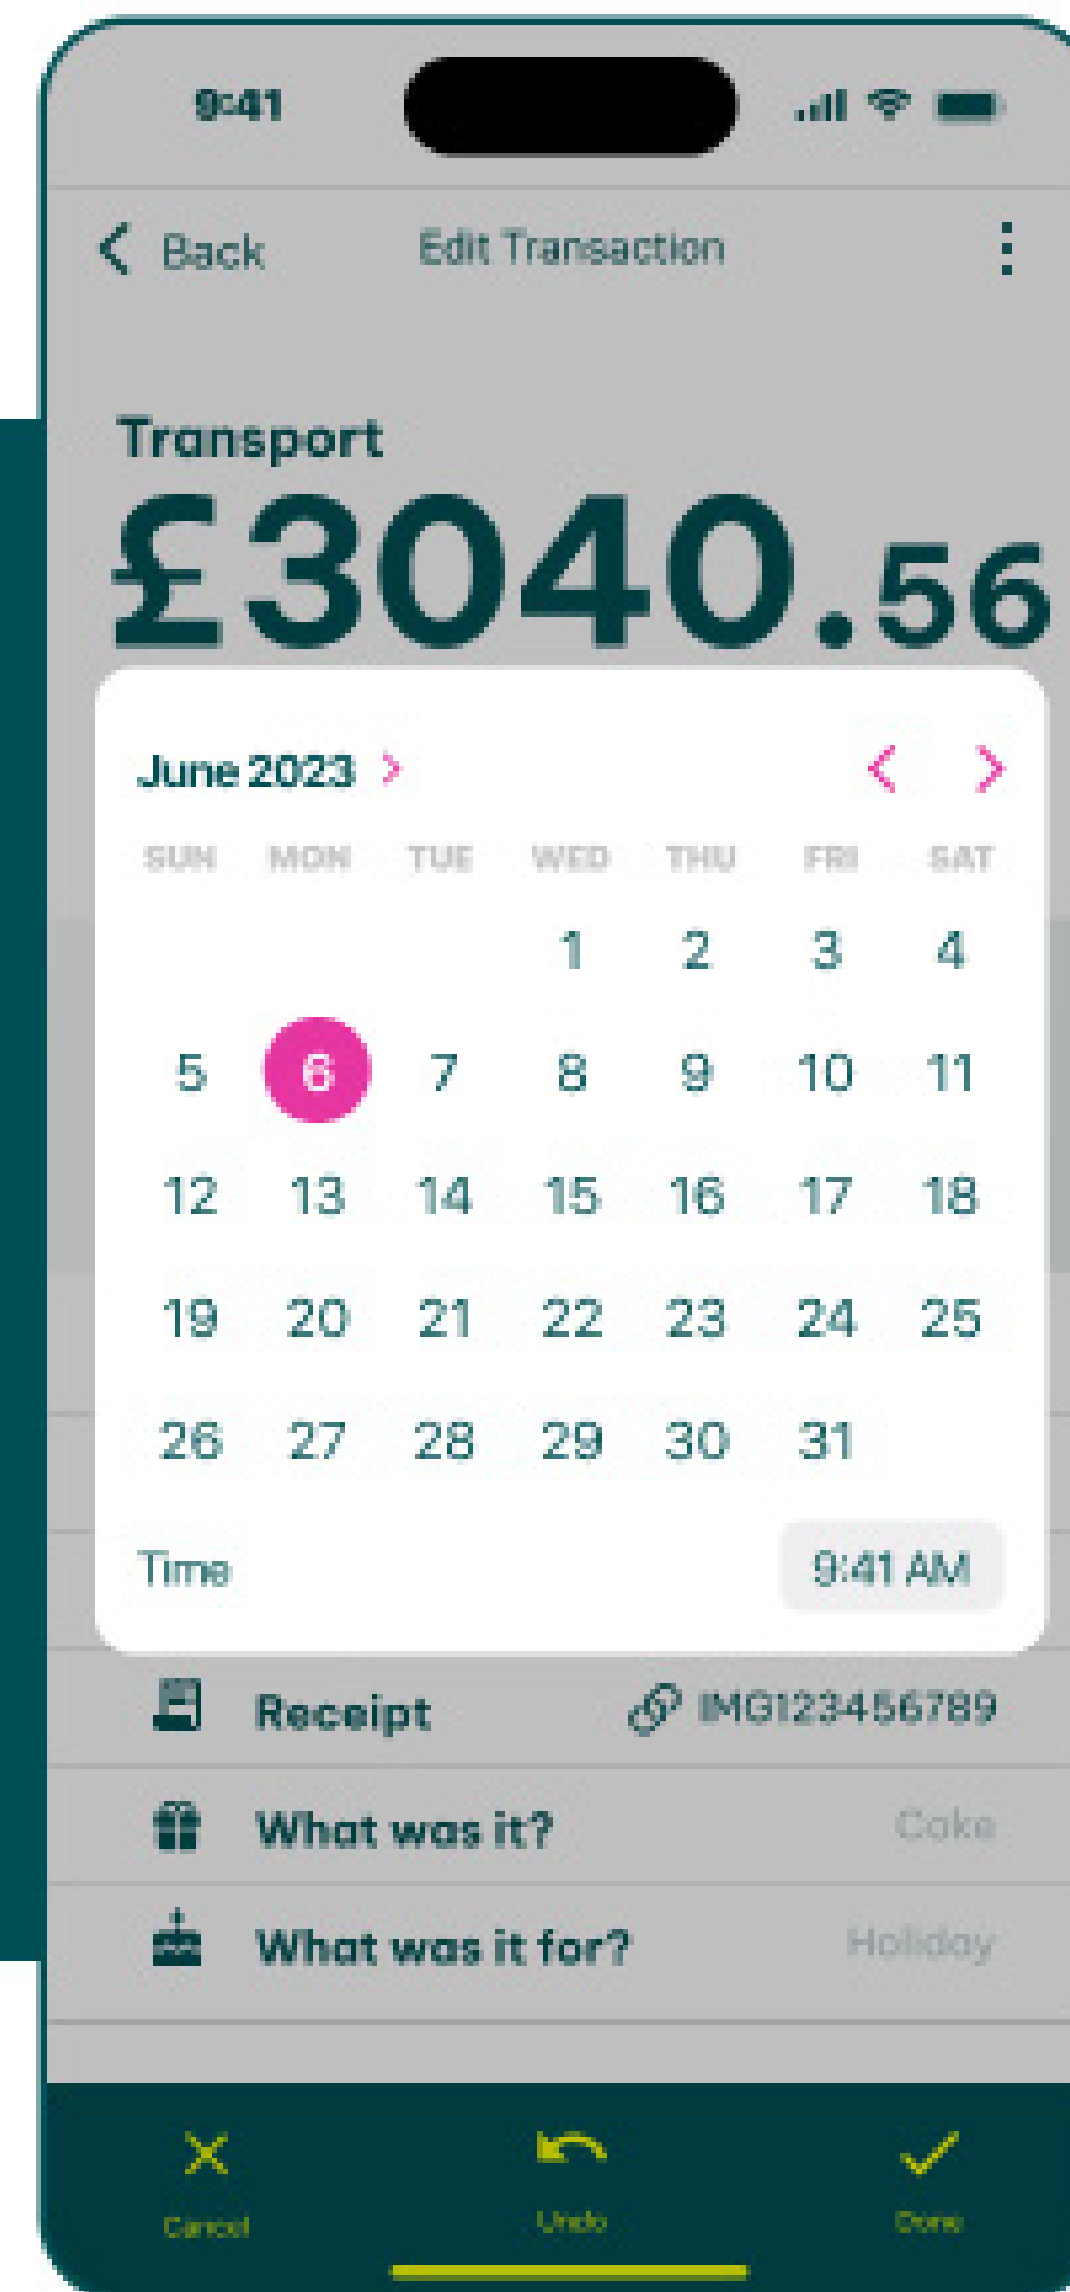

Transaction

Land on the transaction page and click “edit”

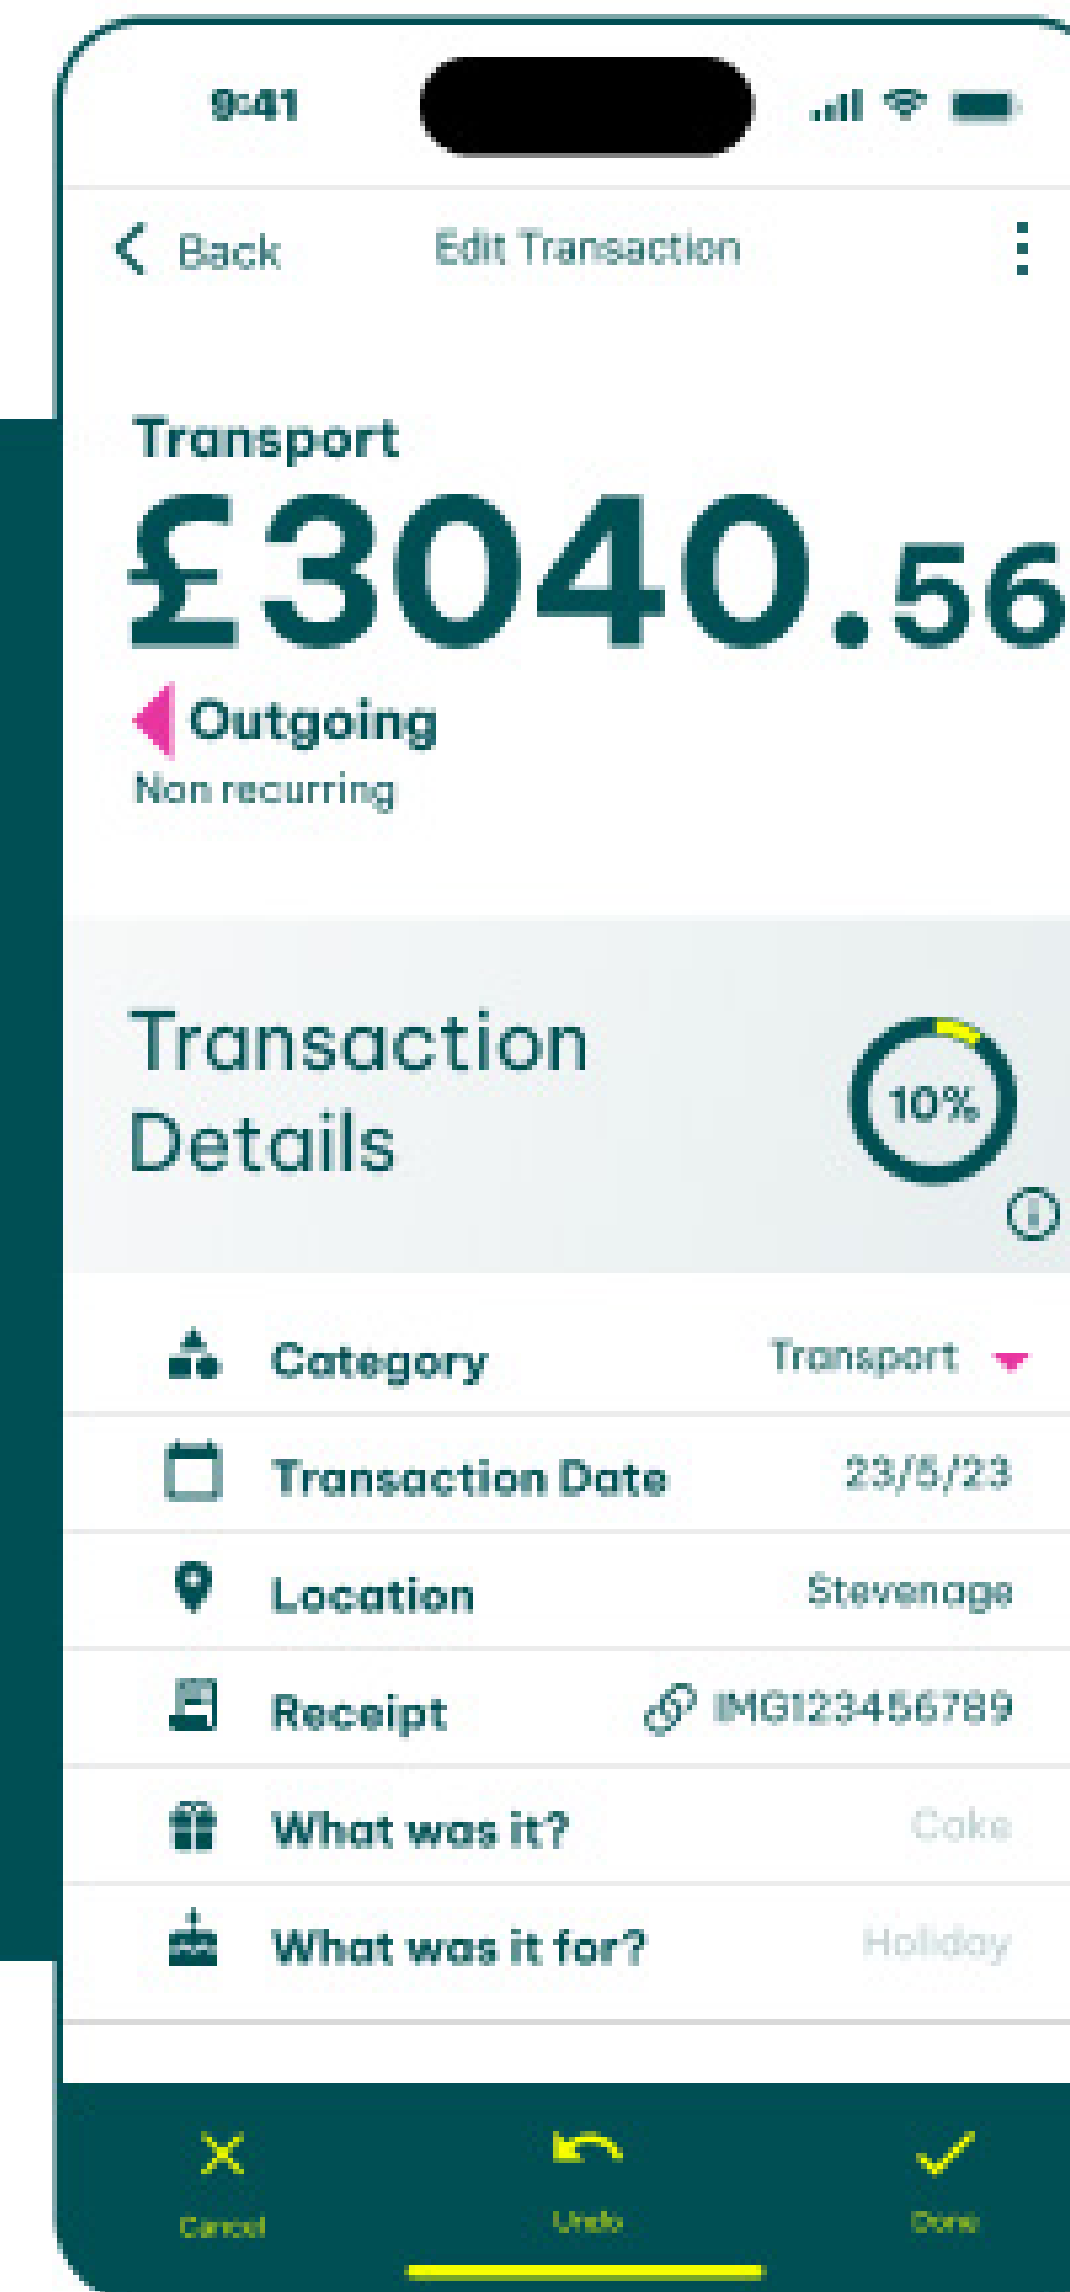

Edit Transaction

Locate date and click to edit

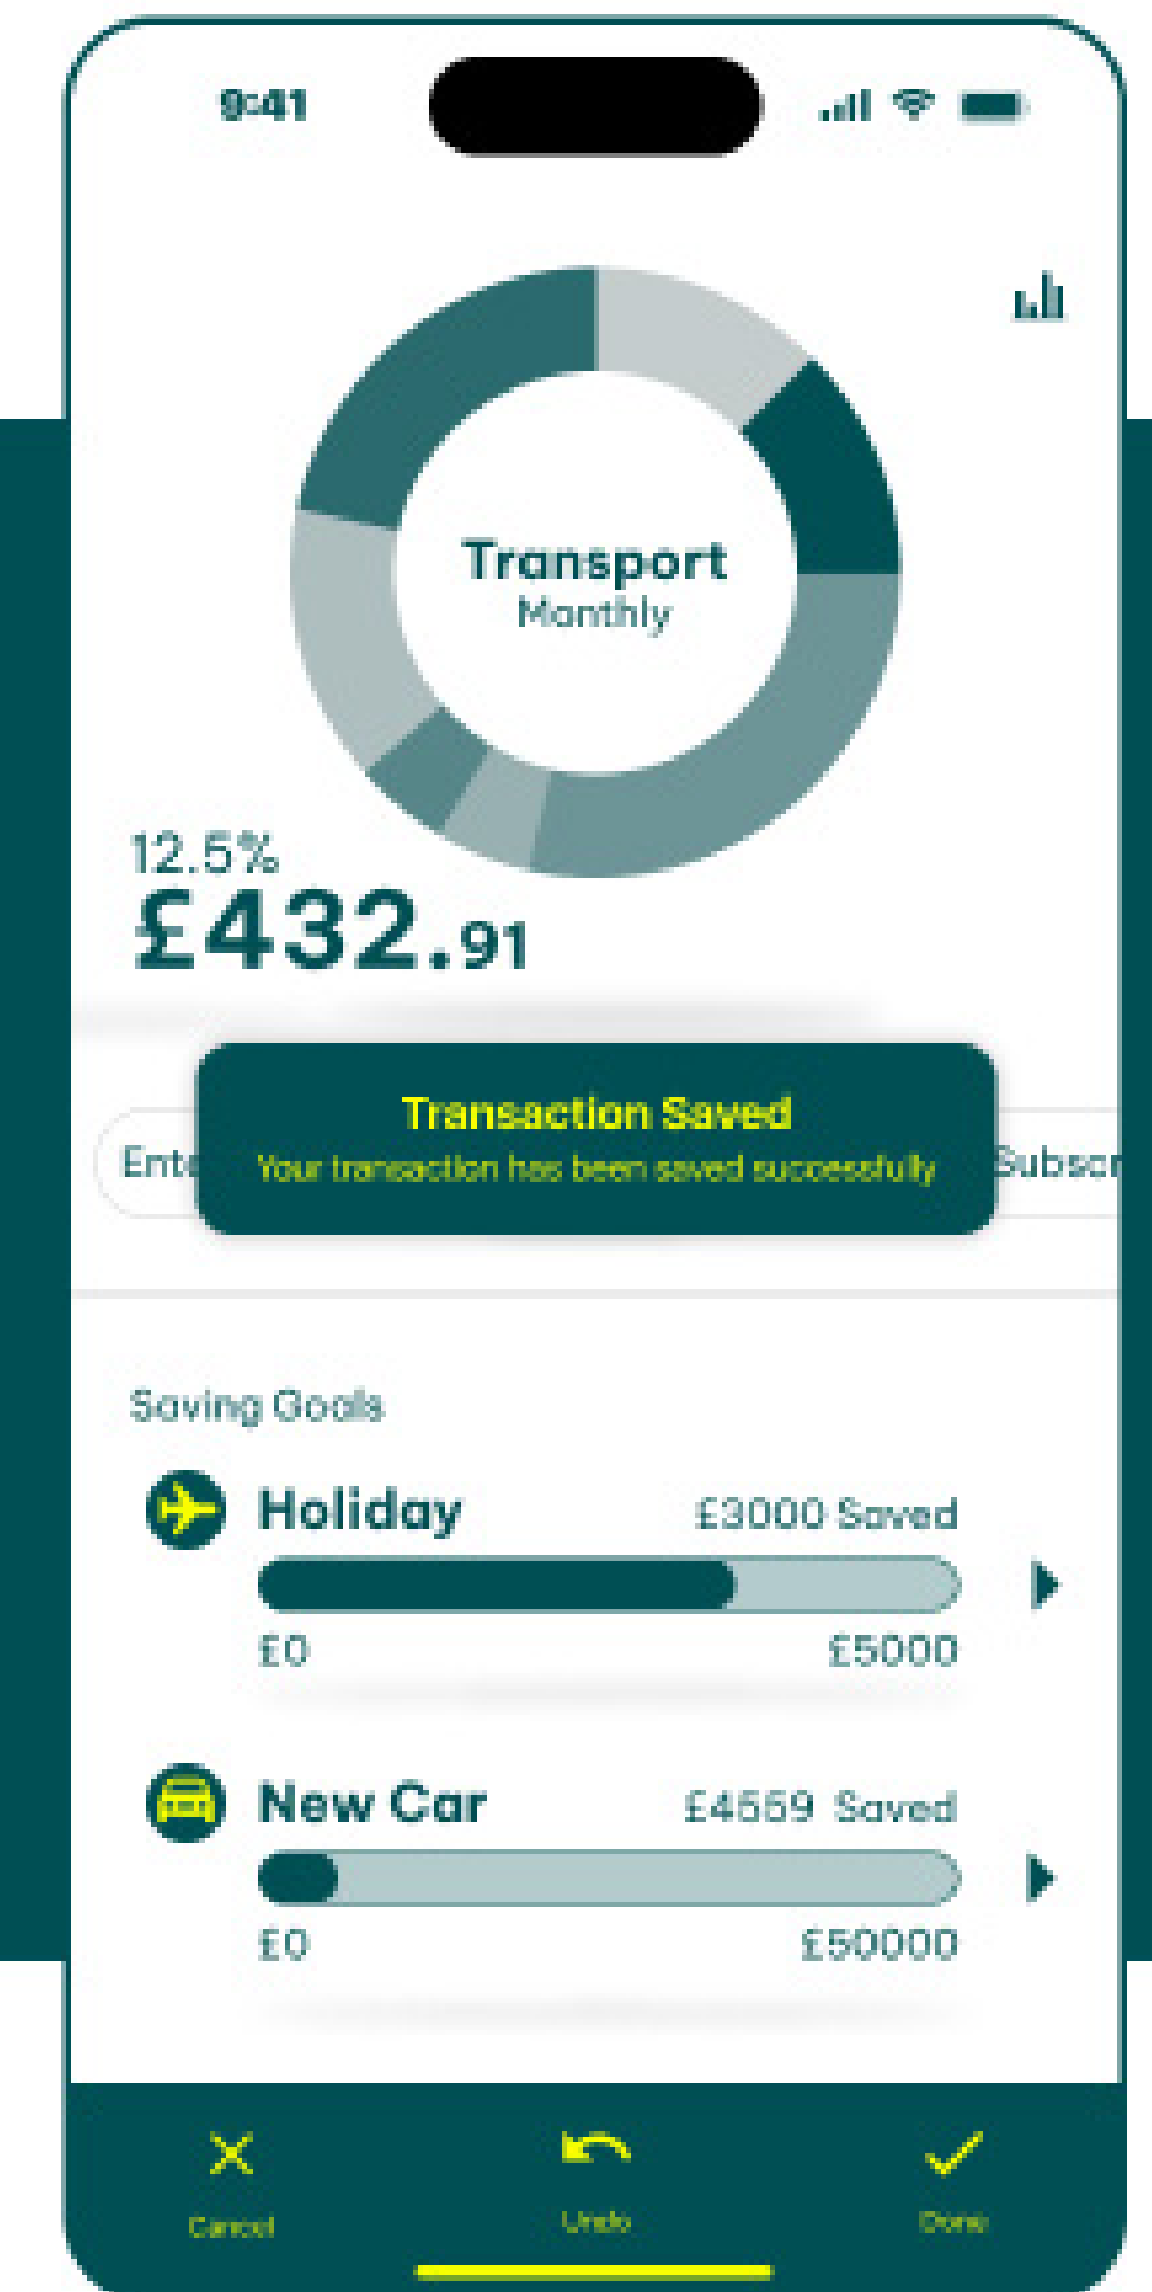

Date Edit

Select new date, calendar closes automatically

Edit Transaction

Return to edit and complete task by pressing save

Confirmation

Return to home and get confirmation that fades after a few seconds
